

EKOTECH

23rd Environmental Protection and Waste Management Expo

8-9 | 03 | 2023

Business in its cleanest sense!

EKOTECH EXPO - BUSINESS IN ITS CLEANEST SENSE!

Are you a manufacturer or distributor of machines and equipment used in the waste management sector? Do you offer services related to waste storage, recycling and transport? Does your company provide solutions for environmental protection and municipal management?

Join the exhibitors' fellowship today! The 23rd International Environmental Protection and Waste Management Expo - 8&9 March 2023.

■ take part

and join the event

■ meet

your clients and partners

■ make the best

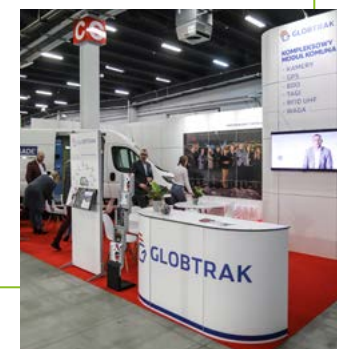

of the industry specialists' knowledge

■ boost

your business

■ The latest trends and technologies

Ekotech brings together top specialists. The expo is the presentation arena for the products and services; the portfolio includes manufacturers of machines and equipment used in waste management, manufacturers of waste transport solutions, and services related to waste segregation. The expo meetings offer the opportunity to learn about the latest industry trends. Apart from modern technological developments, the Exhibitors' offer also includes reliable and proven solutions which have been with us for years. - *The municipal industry offers more specialised equipment, including that for waste reduction, transport and collection. You can see it at first glance when visiting EKOTECH. Modern solutions have already been on show in the Kielce exhibition and congress centre - GPS monitoring of waste collected by a garbage truck, electric platform vehicles and recycling machines, to name a few. The next expo certainly provides us with many industry novelties - emphasises Marcin Musiał, EKOTECH fair manager.*

■ Waste Management Forum

For the 10th time, AK Nova will organise the International Waste Management Forum (MIFOD), which has become a permanent part of the expo agenda. The seminar has been gaining increased popularity among industry visitors every year. The meeting attracts representatives of local governments and government administration, producers and suppliers of municipal technologies, representatives of non-profit organisations and industry experts. The forum aims to present most up-to-date topics and issues regarding waste management, and disseminate knowledge on the latest plans and legal regulations for the industry and innovative solutions in the waste management sector.

Awards and distinctions

EKOTECH is the chance to win the EKOnowator award. In addition, the expo is also the place to award the TOP DESIGN distinctions and prizes.

Wojciech Stawiński
Commercial Director of ELTE GPS LLC

Trade fairs are always an excellent opportunity to present new solutions, and trends and to talk shop, which is why ELTE GPS tries to participate in these events. Ekotech makes it possible to reach a wide group of customers and target our offer for municipal sector companies. The show is the presentation platform for our systems and devices. The Kielce expo is also an opportunity to strengthen the brand image on the market and maintain regular contact with partners. We are glad that we have the chance to participate in this year's expo, and we will definitely come back next year.

Piotr Maciejewski
Coordinator of investment service, Marseplast LLC

Ekotech is a success in terms of its organisation, as the combination of EKOTECH and ENEX undoubtedly increases the number of visitors. This cluster in turn increases the possibility of contacts with future business partners. Winning the EKOTECH MEDAL for the SilverFLOW biological wastewater treatment plant is an additional element which boosts the product promotion on the market. At the same time, this accolade is a great appreciation for MARSEPLAST LLC; the firm has offered products for the environment protection for 20 years. See you next year.

Paweł Kalita
owner of Tech-Ekspert Południe, an authorised dealer of the CASE Construction in Małopolskie, Lubelskie, Podkarpackie, Świętokrzyskie voivodeships

Ekotech is brings together people who are keenly interested in modern solutions for municipal industry entities. We are the company that provides such solutions; thus, the trade show is where we meet customers in person. We value discussions with both purchasing decision-makers and direct users of the machines. Meetings at the expo stand always increase the knowledge capital. We thus know more about the machine buyers' needs and expectations, and we get feedback on the formal and functional side.
