The international foundry business' holiday at Targi Kielce

The cluster of expos under the banner of "Industrial Autumn" – the most important industry meeting in Central and Eastern Europe. The shows have been cyclically held in the Kielce exhibition and congress centre for almost 30 years.

The expos bring together leading Polish and international market companies; they showcase the latest solutions for the

foundry sector. The expo is the meeting point of suppliers of components and technologies for foundries. However, the Industrial Autumn is much more than the offer of nearly 200 companies from 24 countries. There is also a massive dose of knowledge: conferences, discussion panels, seminars and networking meetings.

Green energy and complete digitisation – Foundry Goes Green Seminar

The rich program offer of the METAL Expo is enhanced with the Foundry Goes Green Seminar devoted to modern technological solutions for foundries. We dedicate this event to the foundry presidents, directors and the development and technology departments' staff. Knowledge-packed speeches

and presentations make it possible to pave the way for the introduction of modern, ecological solutions in foundries. In addition, this development scheme boosts market competitiveness.

Prospering for new customers? Do you need inspiration for new solutions? Do you want to check out and benchmark your competitors?

Metal expo – the business sector's most important meeting.

01. Components

Przemysław Czapla
Eurocast

Although this year's show looks a bit smaller than that previous year's expo, we have nothing to complain about. Our products have proven very popular. I am surprised by the substantial investment plans foundries have; Polish manufacturers are not afraid to invest. We had the opportunity to sense this optimism at the expo.

Maciej Cupal
Enimetal

We had high expectations; the expo walks the talk – we are not disappointed. It may seem that there are fewer visitors compared to other trade fairs of this type. We are happy because of that because only business insiders interested in cooperation attend the show. Customers know what they want; they have specific questions and specific business proposals.

Katarzyna Bernaciak
ZGM Zębica S.A.

We have participated and supported the Kielce Metal Fair for many years, as the show is an excellent opportunity to meet contractors. We are certain – this year's event has been successful; we received the Metal Expo Medal for an innovative ecological product for the second year in a row. This time the competition Jury Panel appreciated the Active Eco bentonite mix. We are pleased with the great interest in our products and many visitors' willingness to cooperate. I see how well Metal expo, as usual, has been excellently prepared from the organisational point of view. Knowledge-packed meetings and valuable gatherings, workshops, lectures and a banquet for Exhibitors are the additional competitive advantages of the expo.

The Industrial Autumn is much more than the offer of nearly 200 companies from 24 countries. There is also a massive dose of knowledge: conferences, discussion panels, seminars and networking meetings.

Ask Chemicals

ASKCHEMICALS

The ideal client knows what they need and wants to cooperate with us. Thus we can offer maximum help. We meet such customers at Targi Kielce.

Carola Barattè
Foundry Eccocer

Our company has long-term customers in Poland who have always bought and used our products and have trusted us. We want to develop in the Polish market. The expo presence makes it possible for us to meet new contractors. We also invite those customers that we are unable to visit on a regular basis. Thus this expo was a success. We hope to see you again in two years. We would like to thank the event organisers.

Przemysław Bieńka
Petrofer Polska

The automotive industry is the main target client for our products. We were busy each expo day; our expo stand welcomed many guests interested in cooperation. Generally speaking, we are delighted with the talks held at the trade fair. We are confident that we return to Targi Kielce in the future. We even consider long-term cooperation.

02. Die Casting

Marek Czyżewski
Idra

We are pleased for the consecutive possibility of exhibiting at the METAL Expo; we have been a part of this event for years. We are glad that after the pandemic turmoil, the event has sprung to even greater glory. Important thing is that the investment perspective, in even greater demand than ever, is visible at the expo. We see great potential in our cooperation with Targi Kielce.

Wojciech Kowalczyk
Frech Polska

After a short break, we returned to the Kielce foundry expo. We are glad to have the opportunity of meeting most of the clients, including our key accounts. I noticed that industry insiders were longing for encounters and face-to-face meetings. Thus I am even more glad I could participate in this trade fair.

Alessandro Betti
Agrati

We have participated in the Kielce expo since the very beginning. Interesting meetings, both with regular customers and people looking for an opportunity to expand their offer, are guaranteed here.

03. Foundry machines

Marcin Gliwiński
Huttenes Albertus

Every day of the METAL expo makes us busy, and the expo stand is a full house; all our advisors were busy talking to customers from opening to closing. There were also moments when people were queuing in front of our expo stand. We find our METAL presence successful.

Christian Kurtsiefer
KMA Umwelttechnik

We are particularly pleased with this event's level of professionalism. Not only have I experienced supreme professionalism in the exhibitor's capacity – but I was also honoured to be a conference speaker at the session on energy saving in the foundry business. The Kielce expo turned out to be a perfect platform for knowledge transfer our company has, for ecological attitudes dissemination in this sector of the economy.

04. Heat Treatment

Michał Karol Kozak
Kanthal

KANTHAL®

We were visited by many current and prospective customers already on the first day of the Heat Treatment Expo. Other exhibitors also called into our expo stand. This considerable interest translates into good future perspectives. I believe that it was a fruitful show which made it possible to gain new customers.

05. Prototyping. 3D printing for the foundry business

Artur Szarzec
Voxeljet

We met many interesting customers at Targi Kielce, both those we are familiar with and those who just visited our expo stand to renew business contact. However, we were mainly visited by representatives of companies that want to establish wider-scope cooperation with us.

Targi Kielce – exhibition and congress centre ranked second in Central and Eastern Europe.

Targi Kielce is the organiser of international events with over 30 years of experience. In addition, Targi Kielce is the home of the world-famous International Defence Industry Exhibition MSPO.

A whole array of industries and business-sectors hold their meeting in this 90,000 m2 exhibition centre. Targi Kielce – where millions of dollar contracts are signed.

#BUSINESS

One-stop-shop for the whole industry! No email, telephone or teleconference can replace direct, face-to-face contacts.

#NETWORKING

Business meetings, an inherent part of expos, may build and enhance **business relations based on trust**.

#TRENDS

The economy needs expos – **trade shows are the inspiration source** – direct meetings result in new ideas and innovations.

#EDUCATION

Trade fairs offer an ideal tool to **evaluate and benchmark a particular industry's standing**. Trade shows give a perfect chance to exchange experiences and expand knowledge. **Expos shape the future of business**.

#exhibitionsOFFERmore

Industrial Autumn

– a unique event for the foundry sector's professionals. The industrial expo cluster is a comprehensive, international show with attractive agenda and excellent organisation.
