International Fair
of **Technologies for Foundry**

— ○ **22-24.09.2026** ○ —

Kielce, Poland

HEAT TREATMENT

NonFerra

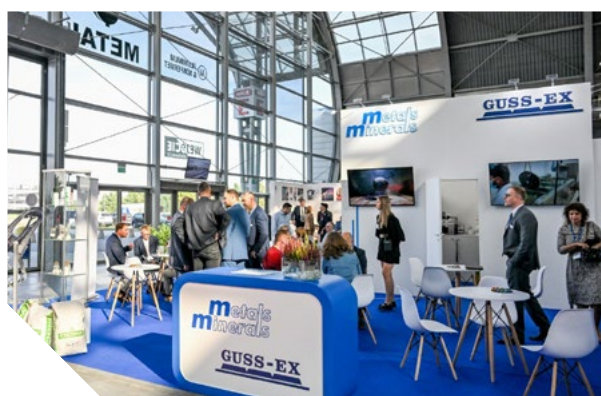

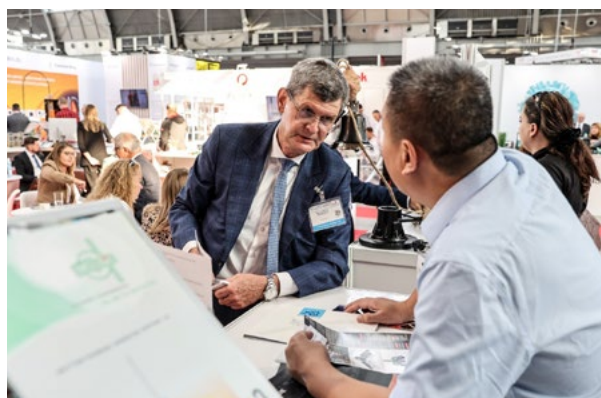

Central and Eastern Europe's leading foundry industry event

The International Fair of Technologies for Foundry METAL has been **the most important event for the foundry industry** in Central and Eastern Europe for years.

For three days, Kielce becomes the focal point for producers, experts and investors interested in the latest technologies, materials and solutions for foundry.

Previous expos attracted **over 200 companies from over 20 countries** – and the upcoming show promises to be even more spectacular. Participants can become familiar with the latest metal-melting technologies, machines, devices, and systems for automating foundry processes.

The expo is enhanced by a rich and diverse knowledge pack – numerous seminars, presentations, and discussion panels, as well as the „Foundry Goes Green” conference, devoted to the sustainable development and transformation of the foundry sector.

THEMATIC ZONES

COMPONENTS AND EQUIPMENT FOR THE FOUNDRY BUSINESS

The zone dedicated to companies supplying broadly defined equipment, components and consumables for foundries. Exhibitors present products such as foundry crucibles, filters and filtration systems, foundry chemicals, separating and lubricating agents, cleaning systems, internal transport equipment, and process automation solutions. This is where suppliers of key components supporting modern and efficient casting production meet.

Companies' list includes: KERAMOST, METALSMINERALS, EUROCAST, ENIMETAL, ZGM ZĘBIEC, FOUNDRY ECOCER, PETROFER.

PRESSURE CASTING

One of the most dynamic zones at the METAL trade fair brings together leaders in pressure casting technology from around the world. The scope ranges from advanced machines and metal dosing systems, through automated production lines. The zone attracts professionals seeking innovative, energy-efficient, and precise solutions for die casting foundries.

Renowned brands such as AGRATI, IDRA, ITALPRESSE/GAUSS, DISA, BÜHLER, OTTO JUNKER, FRECH, GENTEN Machines, LK Machinery and many others present their solutions at the zone.

Why is it worth exhibiting?

METAL is **Central & Eastern Europe's largest and most crucial industry expo**. 2024 expo hosted over 200 companies from 22 countries.

Ideally located expo - a bridge between east and west. Poland is a perfect place for easy access to customers across Eastern and Central Europe. Poland, with its well-developed industrial and foundry sectors, provides a natural production and technological base for the European market.

A comprehensive spectrum of the foundry industry. Exhibitors are not limited to a single area; they can present their products and services at complementary expos: Heat Treatment, Aluminium & Nonferrous, and Control-Tech. The expo cluster in-

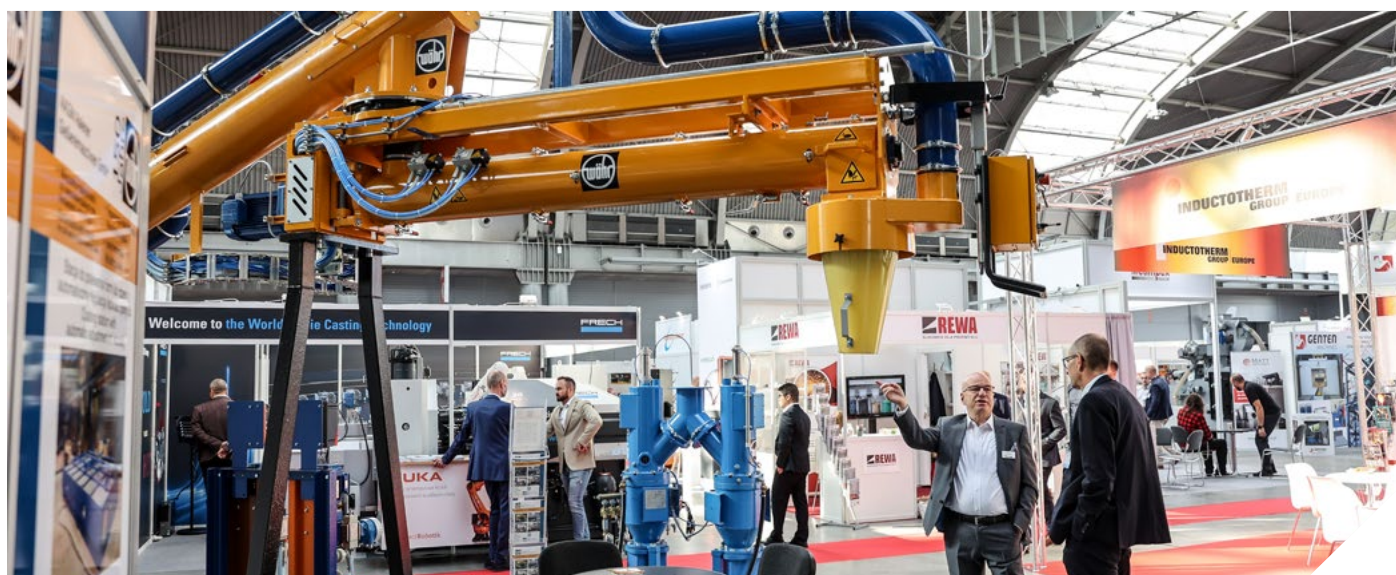

creases the likelihood of reaching various segments and business partners.

The expo format focused on networking and knowledge. METAL is more than an exhibition, as its agenda includes conferences, technical seminars, and workshops that attract decision-makers, technology directors, and opinion leaders in the industry.

Emphasis on sustainable development and industry transformation. The growing importance of energy efficiency, CO2 emission reduction, automation, digitisation and modern technologies puts exhibitors at the centre of Industry 4.0 trends and green transformation.

PROTOTYPING

Solutions for prototyping and casting design are also presented at the show, and companies such as MAGMA showcase their offer. Join the zone and learn how to shorten implementation time, reduce the costs of errors, improve product quality and durability, and better adapt it to customer needs and production technology.

HEAT TREATMENT OF METALS

The Heat Treatment Showroom - the space for companies offering heat treatment technologies and equipment ranging from industrial furnaces, through temperature and atmosphere control systems, to modern heating media and energy-saving solutions. An ideal place to present technologies for hardening, tempering, annealing and nitriding metals in the face of increasing demands on the quality and durability of components. This sector plays a key role in the development of the foundry and metallurgical industries.

The following companies were present at the Heat Treatment sector: KANTHAL, INDUCTOTHERM EUROPE, PYROTEK, AMP, AMPERE, GUENTHER, HERAEUS ELECTRO-NITE, HORNOS Y METALES, S.A., INDEMAK, MTR IZO, TRB Refractory, CALDERYS, and OTTO JUNKER GmbH.

Participants' feedback:

Thomas Fritsch
Foundry Planet

The Metal Expo is an ideal place for industry representatives from this part of Europe. METAL is an important place on the European map in this industry. The media I represent always try to be where the companies, the best products and industry experts mark their presence. Hence, our presence at Targi Kielce.

Przemysław Czapla
Eurocast

The Metal Expo has enjoyed a sterling reputation in the industry for years. Industry insiders join the Kielce expo; we can reach 40-50 large partners and clients in two days – something that would typically take half a year. The expo atmosphere trade is always great. The medal awarding ceremony is essential for many companies, and we look forward to it. Usually, products in this sector often go unnoticed, but the expo is where they are appreciated and put in the limelight.

Andrzej Fidler
Cast Metal, representative of Colosio Group

The atmosphere at the trade fair translates into relationships even between competing companies. This is a narrow-speciality industry where all business insiders know one another; thus, good relationships build our businesses, and Targi Kielce contributes and plays a key role. Therefore, the Metal trade fair is an essential point on our calendar, and we gladly attend it in Kielce.

Doctor Engineer Maciej Brzeziński
Metimpex

The trade fair has developed a lot recently; we have had a lot of clients from the very beginning. Those we value the most are also here to hold many interesting and constructive conversations. That's why we've returned to Kielce for years - to meet our clients during the Metal trade fair, but also to meet new ones who will soon become our clients.

Paweł Szypuła
Pyrotek

This year's trade fair demonstrated the great interest our company enjoys. This translated into new projects. Our opinion about the trade fair? Only positive. If the market situation does not change, we will return to join the next edition.

Rafał Piech
Pyrotek

Participating in the expo allows you to avoid time pressure; those visiting our expo stand feel at ease. We can all devote as much time to conversation as we wish - otherwise, we would not be able to do so in an office or online session.

Pyrotek

Piotr Biernat
BM TRADE - Representative of YIZUMI

The Polish market continues to develop rapidly in this industry. Metal offered several interesting meetings, and we were able to establish contacts with new clients. Each time, the contacts and conversations at the Metal Expo contribute to business opportunities and contracts.

Targi Kielce the business's one-stop shop

-  **Ranked second among all Central and Eastern Europe's exhibition centres**, organiser of 70 trade fairs and 700 conferences a year
-  **Cutting-edge infrastructure:** the nine expo-halls cluster, the Congress Centre, and 2400 parking spaces in the immediate vicinity of the expo.
-  **Excellent Centre offers technical facilities:** the opportunity to present working machines in the expo halls as well as in the open-air arena for shows and presentations.
-  **Excellent Centre's location:**
 - 7 international airports within 2 hours' drive.
 - 8 European capitals located within an 800 km radius.
 - Direct access via expressways connecting Poland's main cities.

Are you seeking new business opportunities and new clients? Do you need inspiration for new solutions? Do you want to check out and benchmark your competitors?
