

ALUMINIUM & NONFERMET, CONTROL-TECH, RECYCLING and HEAT TREATMENT change their date

Targi Kielce has been the meeting space, the events organiser and a partner in business relations establishing for over 25 years. We always go an extra mile trying to meet the expectations of our exhibitors; companies with which we have created trade fair together for many years now. Entrepreneurs are the voice of the industry we listen to most attentively, their opinion is precious and significant to us.

Having considered our exhibitors' opinions and having analysed the market situation, the Targi Kielce Management Board has resolved to change the date of the 23rd International Fair of Technologies for Foundry METAL, the XVI International Fair of Aluminium & Technology, Materials and Non-Ferrous Metal Products ALUMINIUM & NONFERMET, the HEAT TREATMENT expo, the IV Fair of Non-Ferrous Metals Recycling RECYCLING and as well as the XXIX Fair of Industrial Measurement Technology and Non-Destructive Testing CONTROL-TECH. **The expos are to be held between 12 and 14 October 2021.**

The Metal expo and its events accompanying the exhibition have been a melting pot where the metallurgical industry is brought together. The Kielce exhibition and congress centre finds the expos cluster of pivotal importance. In 2018 Targi Kielce hosted the World Foundry Congress participants in Krakow, the Congress enjoyed the Targi Kielce support. The visit of many outstanding industry representatives offered the opportunity to see the importance of creating spaces for meetings. Not only can you get to know the product offer, but also exchange experiences, get to know specialists' opinions and views is the essence.

We make this difficult decision because we believe that next year's October will be a convention. The event we are preparing will not diverge from the standards our exhibitors and visitors are accustomed to.

Targi Kielce President of Board
