## 3D PRINTING DAYS

The 3D Printing Days has been held since 2013. Initially a household name among a limited group of specialists, scientific, research and development milieus. Since 2015, the 3D Printing Days have been included in the Industrial Spring Expo Cluster. Although at the beginning, the industry used to meet twice a year, today, 3D Printing Days are a part of the Industrial Spring held once a year.. 2023 witnesses the 15th edition which also the 10th anniversary of the event.

The Industrial Spring is a top brand among Central and Eastern Europe's industrial expos. Despite the difficult 2020 and 2021, the expo was held as planned and proved to be successful among exhibitors and visitors. The 2021 edition occupied 7 expo halls and hosted over 10,000 people.

### EXPO PROFILE
