We create innovative technologies and produce high-quality machines

WEREMCZUK Company has **40 years of experience** in supporting Polish and worldwide fruits and vegetables farming business. **Quality, reliability and innovative solutions** are the main goals set for our well-coordinated and professional team, creating machines under the **WEREMCZUK brand**.

Everything we do, we do in the best way we can, which is why we have been able to gain **the trust of thousands of Customer from all over the world**.

WEREMCZUK
AGROMACHINES

MODERN TECHNOLOGIES FOR AGRICULTURE

WE SET
TRENDS

WE SET
CHALLENGES

We produce self-propelled harvesters with own drive system and independent steering. **We are not afraid of difficult subjects** like mechanical raspberry harvest or vegetables precise sowing. We constantly control market needs and offer our customers the technology for growing fruits and vegetables based on the latest sciences and solutions. As a company, **we set new trends**. It is a big challenge for our team but gives satisfaction to the job and the opportunity to develop.

WEREMCZUK
AGROMACHINES

We deal with the machines production from the beginning - from the market needs analysis through machines design and implementation to production, sales and service.

What distinguishes us?

We are the answer to your needs by offering professional and functional machines that fulfill your expectations.

We are eager to spend money on the best materials and we always choose the best technological solutions. The high quality of our products has been confirmed by many prestigious awards at agricultural shows and fairs.

We provide you with the best possible customer service and technical support. Passion, commitment and a highly qualified staff are the guarantee for your satisfaction.

We are experienced in designing and implementing new machines for agricultural sector, which is why we are offering you the best solutions available on the market.

Our state-of-the-art machines are being built and assembled in modern technological facilities, taking account of environmental protection requirements.

How to order?

WE SELL OUR MACHINES ALL OVER THE WORLD

You can order the machine by contacting our dealers in your country or by contacting our company directly by phone, fax or e-mail.

We provide you with all the necessary information on the machine you need and help you to choose only the required additional equipment.

If you are a Customer from a non-EU country, we will arrange all the necessary export documentation and pay for the customs clearance in Poland.

If you are a Customer from USA, Canada or other North American country, we can help you to organize a FCL (Full Container Load) ocean freight shipment.
