

We serve You

STOM-TOOL Kielce 2022

HALL B, STAND 39

**Far more
than machines**

www.otinus.com

ABOUT YOU

You are at the trade fair in Kielce as a person responsible for purchasing machines for sheet metal processing. You do not want to disappoint neither yourself nor the company you represent by making a wrong decision. Therefore, you consider following the beaten path and choosing one of the world's top leaders.

However, deep down inside your heart you feel anxiety. This choice, however safe, is not economically justified. **Prices of branded machines are often inappropriately higher compared to the level of necessary exploitation.** You need a device tailored to your company's needs instead of providing three-shift system services. You do not want to think on how to use the machine further to earn its keep. **And you want a new machine to develop your company at the lowest possible cost.** This is why you are searching for the best offer at the trade fair in Kielce.

ABOUT US

Visiting our stand, you will gain **far more than just machines** at reasonable prices.

According to our motto **We serve you**, we will make sure that you receive a complex service that is not available when purchasing from even the world's top leaders.

We serve You stands for:

- Detailed machine matching tailored to your contemporary and future needs
- Issuing an offer concerning precisely calculated extra starting costs including: shipping, consumables or hydraulic oil (depends on machine type).
- Machine installation at your facility
- Machine operational training at your facility

- Remote online machine installations and operational trainings
- Telephone consultations with a technical specialist
- Remote online consultations with a technical specialist (depends on machine type)
- Online access to extended training courses on **Otinus Academy** platform
- Possibility of applying **Otinus Protect**, an individual protection of laser source (extra paid option)
- Extra 10% discount for consumables (depends on machine type)

WHAT MAKES US SPECIAL?

The **We serve You** standard of services will ensure a trouble-free manufacturing process. Direct contact between your operators and our technical specialists means you do not have to spend your time on machine-related matters. In other words, we will give you the **peace of mind** that is so important when running a business.
