

Company Profile

**UKRSPEC
SYSTEMS** —

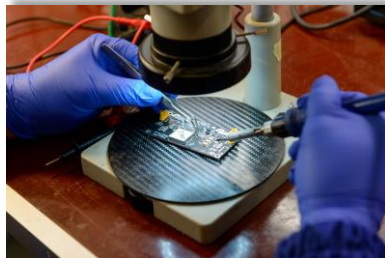

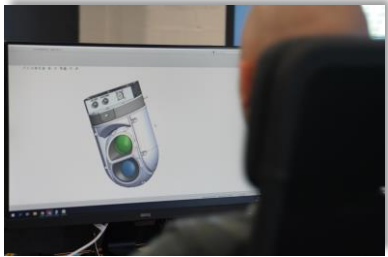

Our story

Hard times create strong men. In our case hard times created our company back in 2014 at the very beginning of the Russian intervention in Eastern Ukraine. The purpose was clear as the sky – Armed Forces of Ukraine had zero drones that were ready for full-scale war deployment. Purchasing was not an option due to shockingly high costs. Besides, it was barely impossible to import UAVs because of complex customs regulations. So, as soon as the problem was pointed out we immediately began our own drones production.

Full in-house cycle

UKRSPECSYSTEMS covers full in-house cycle: R&D, prototyping, engineering, production, quality management, training, and further support. Everything is performed in-company by a team of talented professionals within 5000 m² (53800 ft²) production facilities.

Our production

Over 160 experienced professionals

30+ R&D engineers

20+ designers

45+ workshop specialists

10+ UAV operators

10+ service representatives

35+ administration specialists

What we do?

Our company produces turnkey ready-to-use solutions, as well as provides a wide range of services like agriculture assistance, geodetic aerial photography, gas & oil, pipeline and power lines inspections, and many others. We also share our experience and offer UAV operation training services. UKRSPECSYSTEMS closely cooperates with the government sector and a list of private entities.
