Media coverage:

LADIES AND GENTLEMEN

The 31st International Defence Industry Exhibition was truly exceptional in all its aspects; the show brought together 711 exhibitors from 35 countries, including 350 Polish companies. The trade fair hosted 61 delegations from 43 countries. The 2023 MSPO exhibition used a record-breaking exhibition area of over 34,000 sq m. For the first time in its history, MSPO display was also located in an additional temporary hall of 2,800 sq m. Almost 26,000 guests from all over the world attended MSPO 2023. MSPO was visited by President Andrzej Duda, who has granted his honorary auspices to the Expo. In addition to the President, the event was also graced with the presence of Prime Minister Mateusz Morawiecki and Mariusz Błaszczak, Minister of National Defence and Jacek Siewiera, the head of the National Security Bureau. Korea was featured as the Lead Nation Exhibition; the Korean delegation was headed by Eom Dong-hwan, the Minister of Defense Acquisition Program Administration (DAPA), of the Republic of Korea. The commanding staff of the Polish Army also took part in the event.

Serving the country's security, increasing access to global technologies, and exchanging ideas and experiences - the organisers of the MSPO have found these overriding objectives pivotal since the first expo unveiling. Contracts and agreements worth PLN 155 billion were signed at the four-day expo. I am convinced that the mission we undertook over three decades ago is still successfully implemented.

I would like to express my gratitude to those who have contributed to this success. At the opening ceremony, the President of the Polish Armaments Group, Mr. Sebastian Chwałek, said that the International Defence Industry Exhibition is the effort of many people. I do agree with this statement. From my perspective, not only does this opinion concern us, the expo organisers, but also Exhibitors, soldiers who prepare and execute the Armed Forces Exhibition, official guests who have supported MSPO and have been involved in MSPO idea out of concern for the country's safety and security.

I wish to express my thanks for your presence. Let me use this opportunity to invite you to join the upcoming MSPO held in 2024.

*President of Board,
CEO Targi Kielce*

KOREAN ACHIEVEMENTS PRESENTED IN TARGI KIELCE

The MSPO 2023 Lead Nation Exhibition featured South Korea. This Asian country was appointed the MSPO Lead Nation role for the second time.

Korea's military potential was presented at the 25th anniversary MSPO for the first time. The choice of South Korea in 2023 was almost obvious.

The Program Board's proposal and then the decision of the Ministry of National Defence to invite the Republic of Korea to organize the Lead Nation Exhibition was a natural step. The Polish government has resolved to purchase extensive military equipment from Korea. The agreements were also signed at 2022's defence industry trade show in Kielce.

The Korean display included equipment ordered by the Polish army, such as Chunmoo missile launchers and K2 tanks, which the Polish Armed Forces will soon use. The modern vehicle assortment also included the K808 wheeled armoured vehicle, the UGV multi-purpose uncrewed ground vehicles, as well as mock-ups of defence unmanned aerial vehicles and unmanned land vehicles. The exhibition also included a light tactical reconnaissance vehicle - KLTV Reconnaissance, and the armoured, tactical hydrogen-powered ATV

vehicle, FA-50 light combat aircraft, which will also serve in the Polish Armed Forces, and the KF-21 multi-role fighter prototype (presented as mock-ups).

31 companies presented the Korean defence industry's potential. The Korean expo presentation was complemented by a show of taekwondo masters and performances by the Naval Orchestra, accompanied by dancers in traditional dragon outfits.

Jong-Sup Lee, the Minister of National Defence of the Republic of South Korea, visited the Kielce exhibition and congress centre the week preceding the MSPO commencement. The Korean delegation headed by the Minister met President Andrzej Mochon and the task force of the International Defence Industry Exhibition. The Minister visited the expo stands of Hyundai-Rotem and Hanhwa, still under construction, during his expo tour.

CONTRACTS WORTH BILLIONS

Agreements worth nearly PLN 155 billion were concluded at Targi Kielce's event.

PLN 100 billion is the value of the contracts approved by the Minister of National Defence Mariusz Błaszczak. Contracts concluded between the State Treasury and the government of the United States of America concerning the purchase of elements of the WISŁA anti-aircraft and anti-missile defence system were also signed during MSPO. Poland will obtain 12 omnidirectional LTAMDS radars, 48 launchers of the PATRIOT M903 system and a supply of PAC-3 MSE missiles. Other agreements relate to the supply of the Narew and Pilica+ programs' components, NSM anti-ship missiles for the next two squadrons and Fly-Eye reconnaissance drones. 1,700 of these unmanned aerial vehicles are to be delivered by WB Electronics.

About 20 contracts and agreements were concluded by the Polish Armaments Group on the first three days of the Show, including financially binding ones worth PLN 54.1 billion. PLN 100 million of this amount has been earmarked for Mesko in Skarżysko for ammunition supplies, including anti-aircraft missiles. Some of the agreements signed during MSPO will soon translate into actual, financial values; and

among them is the contract for the production of American Javelin anti-tank missiles in Mesko. The Skarżysko-based company will be the first foreign plant where Javelins will be produced; the contract value is expected to reach hundreds of millions of PLN.

At Targi Kielce, PGZ has also officially acquired cooperation partners. These partnerships will result in the development of new technologies. As a result of the agreement with Military Communication Works No. 1 SA and the Polish ICEYE company, the operator of radar satellites, a constellation of radar satellites with a stationary and mobile ground station are to be prepared for the use of the Polish Armed Forces. This solution is intended to revolutionize the information collection and decision-making system in frontline operations. The real-time image will be transmitted via satellites to the command and control centre.

The agreement concluded between the Łukasiewicz Institute of Aviation and the Polish company Jakusz also reaches out to space - the collaboration will result in ecological and high-performance space propellants, i.e. rocket fuel.

MSPO - DISCUSSION ARENA FOR IMPORTANT TOPICS

The International Defence Industry Exhibition was complemented by knowledge-packed meetings. 2023 show witnessed 38 seminars, briefings, conferences and debates.

The list of most essential events MSPO 2023 accompanying includes the debate organised by the Ministry of Development and Technology on „Transforming the European Defence Industry”, which brought participants - Polish and European experts in the field of defence and development. In the course of the discussion, the experts also referred to specific tools at the disposal of the European Union in the context of the development of the defence industry. Thanks to the expertise of the high-level speakers, the event allowed its participants to set a strategy related to the directions and dynamics of the development of the European defence industry.

Also, the National Security Office organised a strategic debate devoted to logistics processes in the Polish army. – There is no better place than Targi Kielce to discuss such a key issue, which requires expertise. The MSPO witnesses the visible and tangible change in the technological quality of the equipment - said the head of the National Security Bureau, Minister Jacek Siewiera. Army Generals and defence sector experts took part in the discussion.

The Polish Armed Forces exhibition has been an inherent part of MSPO for 24 years. This year’s mi-

litary exhibition was held under the banner of „New equipment - new challenges - new opportunities”. All armed forces branches, military universities and scientific institutes presented their latest achievements and equipment. The exhibition halls and the outdoor exhibition grounds were the display for M1A1 Abrams tanks, K-2 Black Panther, Leopard 2 PL, 155-mm Krab howitzer, 155-mm K9A1 self-propelled artillery howitzer, M142 Homar A/HI-MARS missile launcher, Baobab scattered mine laying vehicle, M903 A1 Patriot launcher and Skyc-trl anti-drone system. The Exhibition of the Polish Armed Forces was organised by the General Staff of the Polish Armed Forces for the fifth time. The Inspectorate of Support for the Armed Forces was responsible for the preparation and coordination of all activities and, thus, the participation of military units in the exhibition.

Important events marked the MSPO agenda, and among them, the gala Inauguration of the School Year for Uniformed Classes graced with the presence of the Minister of National Defence. There was also the gala signing of an agreement between Targi Kielce and the AI Worden Endeavor Scholarship Foundation. An explosion-proof Wiktorija container by Jakusz on a Zasław chassis was officially presented to police pyrotechnicians from Ukraine.

AWARDS AND PRIZES

REPUBLIC OF POLAND PRESIDENT'S AWARDS

or the best product which serves the purpose of the RP
Armed Forces soldiers' safety enhancement

- ☆ Consortium: Huta Stalowa Wola Steelworks SA (leader), Military Mechanical Works SA, Military Electronic Works SA, Military Engineering Works SA, Military Engineering Works, Military University of Technology, Military University of Technology, Warsaw University of Technology, Research and Development Centre of Mechanical Devices LLC. and Rosomak SA for the new BORSUK amphibious infantry fighting vehicle (NBPWP)

The product is co-financed from the state budget, the National Centre for Research and Development and own funds.

- ☆ WB Electronics SA for the battery module of the GLADIUS unmanned reconnaissance and strike system

THE MINISTER'S OF NATIONAL DEFENCE'S DISTINCTION

PGZ NAREW Consortium: Polish Armaments Group SA (leader), Pit-Radwar SA, Jelcz Sp. z o. o., Military Armament Works SA, PCO SA, MESKO SA, Tarnów Mechanical Works SA, Huta Stalowa Wola Steelworks SA, Military Electronic Works SA, Military Communications Works No. 1 SA, Maritime Technology Centre SA Research and Development Centre for MAŁA NAREW6

The product is co-financed from the state budget, the National Centre for Research and Development.

THE SPECIAL DISTINCTION OF THE PROGRAMME BOARD

The Whiskey Project Group LTD for WHISKEY Multi-Mission Reconnaissance Craft (MMRC)

THE DEFENDER AWARD

The Defender Award recognises products of distinctive quality, originality and innovation of technical solutions, exquisite operational values, as well as favourable economic indicators.

☆ Military Institute of Armament Technology, MSP Inn-Tech LLC
for the GIEZ unmanned combat system

☆ The Military Institute of Armoured and Automotive Technology, (leader) STEKOP S.A, Auto Podlasie LLC., AP Solutions LLC., JPBC LLC
for the autonomous integrated reconnaissance platform „AIRCON”

☆ Creotech Instruments SA
for HYPERSAT - a Polish modular platform for designing and building satellites

The product is co-financed from the state budget, the National Centre for Research and Development.

☆ SILTEC LLC
for the KCT containerised tactical centre

☆ Military Communication Works No. 1 SA
for MCC1 - mobile communication node of the Wisła system - phase I (Mobile Communication Centre - phase I)

The product is co-financed from the state budget, the National Centre for Research and Development.

☆ the Consortium: PGZ ZURAD LLC (leader), MODULAR System LLC
for the Arms Warehouse

☆ ARPOL Professional Tools Warehouse
for the MMZW mobile modular replaceable tank

The product is co-financed from the state budget, the National Centre for Research and Development.

☆ Air Force Institute of Technology (leader), Was Studies University, Military Electronic Works SA
for the SSPWE training ground training system for electronic warfare conditions

The product is co-financed from the state budget, the National Centre for Research and Development.

☆ Jarosław Dąbrowski Military University of Technology (leader), JSW Nowe Projekty SA, Vortex LLC, SZYBICKI Equipment and Superstructures for Specialised Vehicles Waldemar Szybicki
for the prototype of a mobile multi-sensor surveillance system designed to secure the border zone

☆ Jakusz LLC
for the light, gas-tight ALEXA pyrotechnic container

The
DEFENDER
Awards have been
awarded since
1995.

Purpose of the expo visit

EXHIBITORS' FEEDBACK

MBDA

I think it's been another very exciting MSPO. The 2023 edition for MBDA has been a really fantastic exhibition. We were very proud on day one to witness our Polish partners, PGZ receive their executive contracts for the NAREW air event programme, which we will be working with them on to manufacture missiles and launchers in Poland. And we are also very proud the day after to sign an agreement with PGZ on the future development of missiles, new missiles for the Polish armed forces. For us, this has been a very, very good show.

Nick de Larrinaga
Company Spokesman

important it is to invest in defence capabilities. And I think this is very well shown here in Kielce this year.

Jukka Holkeri
Executive Vice President, Global Division

more cooperation in the international area. We can say that easily.

Cenk Sumbas
America and Europe Regional Manager

This is our second times we are attending MSPO; it is very important for us to be here. MSPO gives us the big advantage, we can reach to the right persons and Poland's agencies. MSPO helps us grow in Poland. In my opinion, MSPO keep developing and business in Poland is getting better and better. And Poland's armed forces are getting

For us, a part of Team Defence Australia, MSPO participation gives us exposure to the European market, especially at the convention the size of this year's MSPO. We've had a number of very interesting discussions with the Polish military, Polish companies and other companies from Europe who are interested in our targeting system. We would not

Patria

I feel that this is busier than before; more visitors than at previous shows. And obviously, the world situation, Russia's aggression in Ukraine makes it visible that Western European countries, countries sharing our values, understand how

have probably got those leads if we had not come to MSPO. MSPO is just fantastic.

Paul Fisher
Chief Commercial Officer

In my opinion, the size and the popularity of MSPO keep increasing. Thus, the interest of MSPO visitors from various countries and representing various industries is also growing. This interest could be seen at this year's Show. Our expo stand hosted the President, the Prime Minister, the Minister of National Defence and many other VIPs. Such events are extremely important for our company.

Peter Bae
Vice President Hanwha Aerospace Europe

Polish Armament Group finds MSPO a significant event; the Show is a permanent fixture in our business calendars. Not only does the expo participation offer the opportunity to show our portfolio, but above all, to talk to our partners, not only domestic ones. We engage with mainly international collaborators, for example, the country which is the Lead Nation Exhibition organiser. South Korea is one of the key partners in most of the large-scale modernisation programs we implement. MSPO is also an opportunity to participate in various types of forums, discussions and exchanges of views, which later result in programs. Thus we enhance the intellectual base of the Polish Armaments Group. It needs to be remembered that we employ 20,000 people, including engineers and constructors. They find the Kielce

expo participation an opportunity to talk to other manufacturers about the latest trends in our sector.

Jacek Matuszak
Manager, Communication Department

This year's MSPO is fascinating, it abounds with new equipment, there are also many new exhibitors. South Korea's display is also exciting. We are pleased that the exhibition uses even more prominent display area than before.

We find it important to participate in this year's MSPO, especially because we are in a difficult geopolitical situation, a frontline country. We are aware that our role, i.e. the industry's industry objective is to support all activities related to state defence and increasing readiness for difficult situations.

Artur Wojtas
Management Board Member,
Aftermarket & Flight Operations Director

This year's Show is impressive with its many exhibitors, stands galore, ample of equipment, not only from Polish but also from foreign companies. We have seen great interest in our products.

My organisation rating - A+, everything has been perfectly organised. There are a lot of visitors, not only company representatives, but also the military.

Marcin Bieńkowski
Construction Department

The size of MSPO came as a positive surpris this year. There is a lot more equipment and many exhibitors and visitors. Compared to previous years, we have seen immense progress and that makes us happy.

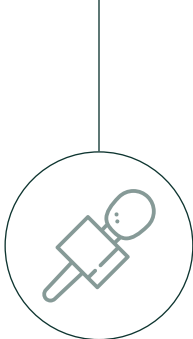

Participating in MSPO and contact with people is a massive benefit for us; we meet new clients and many new suppliers, we can talk to them face to face, meet new people, and exchange business cards.

We have exhibited at the MSPO for probably 20 years. We are at the same location every year, so we will definitely see each other again next year.

ka z odległości większej niż 135 mil morskich (250 km). W najnowszej wersji pocisku udało się jeszcze zwiększyć zdolności systemu do wykrywania i przechwytywania celów w każdych warunkach pogodowych i o każdej porze roku. NSM to waga 400 kilogramów czterocentrowa, manewrująca rakietą naprowadzana unikalną, pasywną głowicą wykorzystującą GPS i systemy podczuwani. Dekadę temu pocisk był przełomową konstrukcją o cechach stealth na rynku i do dziś jest bronią niezwykle trudną do wykrycia i powstrzymania. System obserwacyjny głowicy zawiera bazę danych o okrętach, która pozwala identyfikować wrogie jednostki i eliminować zakłócenia.

Korea Południowa imponuje na MSPO

W tym roku krajem wiodącym, który wedle tradycji kieleckiej wystawy ma przywilej prezentować możliwości rodzimego przemysłu zbrojeniowego, była Korea Południowa. Nie ma się co dziwić. Kraj w ostatnich latach wyrósł na strategicznego i być może wręcz najważniejszego partnera polskiej zbrojeniówki. Na tegorocznym MSPO

Do Kielc wjechał sprzęt wojskowy

W Kielcach trwa trzecia postawiona w historii, po Paryżu i Londynie, wystawa tego rodzaju obronnego w Europie. Kielce obierano jako miejsce na 25. międzynarodowy Salon Przemysłu Obronnego, który cieszy się ogromną popularnością wśród gości z całego świata. Na stoiskach polskich i zagranicznych eksponowane są różnorodne sprzęty wojskowe, w tym: samoloty, helikoptery, czołgi, transportery, wyrzutnie rakiet, systemy obrony powietrznej. To nie wszystko – na targach firmy prezentują również nowoczesną technologię w dziedzinie informatyki i logistyki. Na wystawie można również znaleźć wiele firm z branży cywilnej, w tym: firmy zajmujące się produkcją i dystrybucją sprzętu wojskowego, firmy zajmujące się produkcją i dystrybucją sprzętu wojskowego, firmy zajmujące się produkcją i dystrybucją sprzętu wojskowego.

MSPO Military Exhibition 2023 In Poland: South Korea to Be the Lead Nation For the Second Time

The situation in the military cooperation between Poland and South Korea is very indicative against the background of Russia's full-scale war against Ukraine and the latter's complete dependence on partners' military support.

The reason that South Korea featured as the Lead Nation at this year's International Defence Industry Exhibition is the result of Polish decision to purchase a large quantity of military equipment from this country. Along with helicopters, armoured equipment and tanks, explosives, chemical troops equipment and materials from all over the world, there will be K2 tanks and K9 howitzers displayed (contracts to purchase a thousand K2 tanks and over 600 K9).

W przyszłym roku zamierzamy przeznaczyć na obronność 137 mld zł, czyli 4 proc. PKB. To robi wrażenie na świecie, ale co najważniejsze pozwala na szerszą modernizację Wojska Polskiego – mówił prezydent Andrzej Duda podczas otwarcia 31. Międzynarodowego Salonu Przemysłu Obronnego. – Silna armia jest najlepszym argumentem odstrasającym agresora – dodał minister Mariusz Blaszczak.

Army Recognition

The 31st edition of MSPO sprawled across 34,000 square meters of exhibition space in Kielce, Poland. With over 700 participating companies and more than 60 delegations from 36 countries, the event drew an impressive crowd, attracting over 25,000 visitors.

South Korea took center stage this year, chosen as the lead nation for the exhibition. This honor followed their significant defense deals with Warsaw, including the supply of the advanced K2 tanks. As the lead nation, Korea not only showcased its defense prowess but also hosted a pivotal conference on bilateral defense industry cooperation.

Several Korean defense giants, including Korea Aerospace Industries and Hanwha Aerospace, were among the 30 participating companies from the nation. Their displays were highlighted by the K2PL tank, a state-of-the-art machine now serving with the Polish army.

The US Army also marked its strong presence, showcasing a range of military equipment. Visitors were treated to static displays of the M109A2 ARV, JLTV, M-Shorad Stryker, HIMARS, M1A2 Abrams tank, and the Chinook CH-47F transport helicopter.

For a detailed video report of the first day's events and more, enthusiasts and industry professionals are directed to Army Recognition's official website and YouTube channel.

Stay tuned for more updates from the defense world.
