Catalogo Generale

Effecto Group is a global provider of solutions for industrial automation and robotics, in particular “end-effectors” and “end of arm tooling” (EOAT), essential devices for the automation of industrial production processes.

We are a group of global companies that use their stable core of values and beliefs to reinvent themselves, remaining an unique and reliable partner for customers and suppliers.

**San Maurizio d’Opaglio (NO)  
ITALY**

Know-how, research, dedication are Tecnomors’ hallmarks. The experience in delivering performing and long-life products gained since the ‘60s allows us to meet gripping and clamping requirements of customers all around the world. Our engineering team is composed of very skilled people, capable of analyzing every request and proposing customized solutions featuring the most advanced technology. The constant activity on global industrial markets ensures the availability of our products and services.

**Glenville, NY  
USA**

Specialized solutions in wrist-down robotics — for your industry or application. For decades, Applied Robotics has been the company that industries turn to when their productivity is being stalled by their existing tooling options — or when there are no workable options to turn to. We specialize in solving those problems with industry-specific, application-specific tooling solutions. Refining the technology. Finding the routes to higher productivity. And delivering these innovative solutions to industries worldwide.

**Castelleone (CR)  
ITALY**

A brand featuring a strong footprint in clamping and workholding applications. We supply both standard and customized solutions for specific needs. We work closely with our customers to provide the best solution to a workpiece clamping or handling problem. Quality, reliability and efficiency are the targets that every day engage us to customer satisfaction.

## VISION AND MISSION

Effecto is committed to providing reliable, dependable end-of-arm tooling and workholding solutions that are specifically designed to solve organizations' unique applications and challenges. Our mission is to collaborate and partner with each of our customers to help meet their specific needs with solutions that deliver value.

## MANUFACTURING

Effecto offers a wide variety of products that deliver high-precision and long-lasting results through the use of advanced manufacturing technologies. Our flexible product platform also allows for the quick development of custom solutions, meeting your specific challenges.

## MARKETS

Effecto's solutions are used for industrial automation all over the world in a wide array of industries such as transportation, life science, medical, electronics, fabrication and manufacturing of any product, food and beverage, and energy.

## KNOW-HOW

As a leader in innovation with a long-standing experience in several automation fields, our team of engineers are highly focused on delivering solutions that guarantee high-precision and repeatable products that increase output, efficiency, and safety while reducing downtime, maintenance, and repair costs.

## QUALITY

Effecto understands the importance of production up-time, product yield, and operator safety in automated systems and is fully dedicated to maintaining the highest level of quality in every aspect of our organization. Our staff of problem-solvers are committed to delivering value to our partners by following our Quality Management Principles: Customer Focus, Leadership, Engagement of People, Process Approach, Improvement, Evidence-Based Decision Making, and Relationship Management.

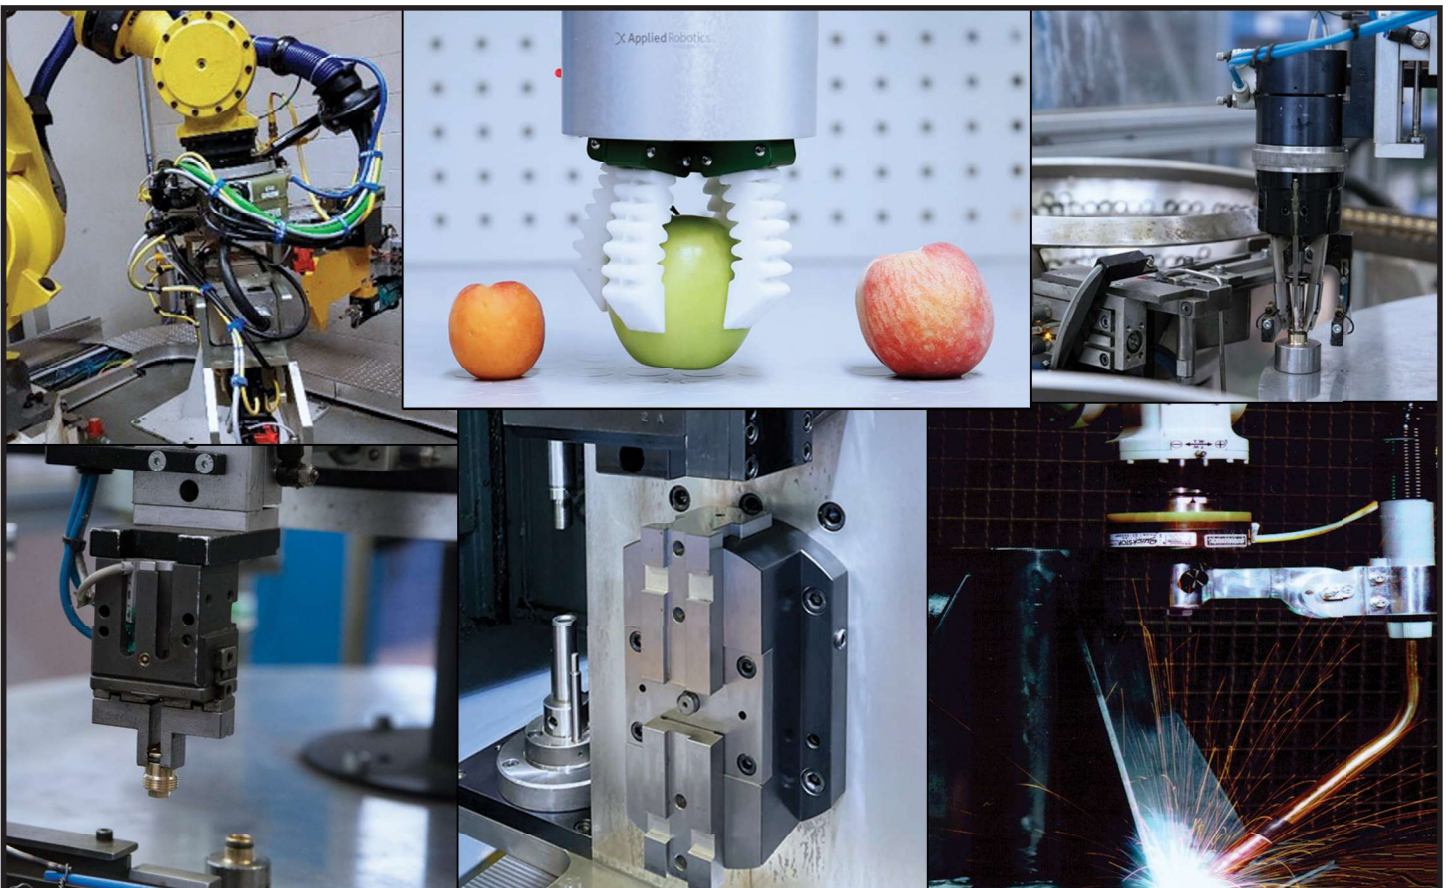

## SERVICE

Our objective is to build a network and community of partnership channels that leverage Effecto's approach to solving robotic and automation applications. With a world-class global sales and service network, our collaborative approach ensures that the unique challenges that our partners face are analyzed by experienced engineers and they receive a tailored solution.

WE WILL HELP YOU  
SOLVE ANY ROBOTICS  
AND AUTOMATION YOU FACE

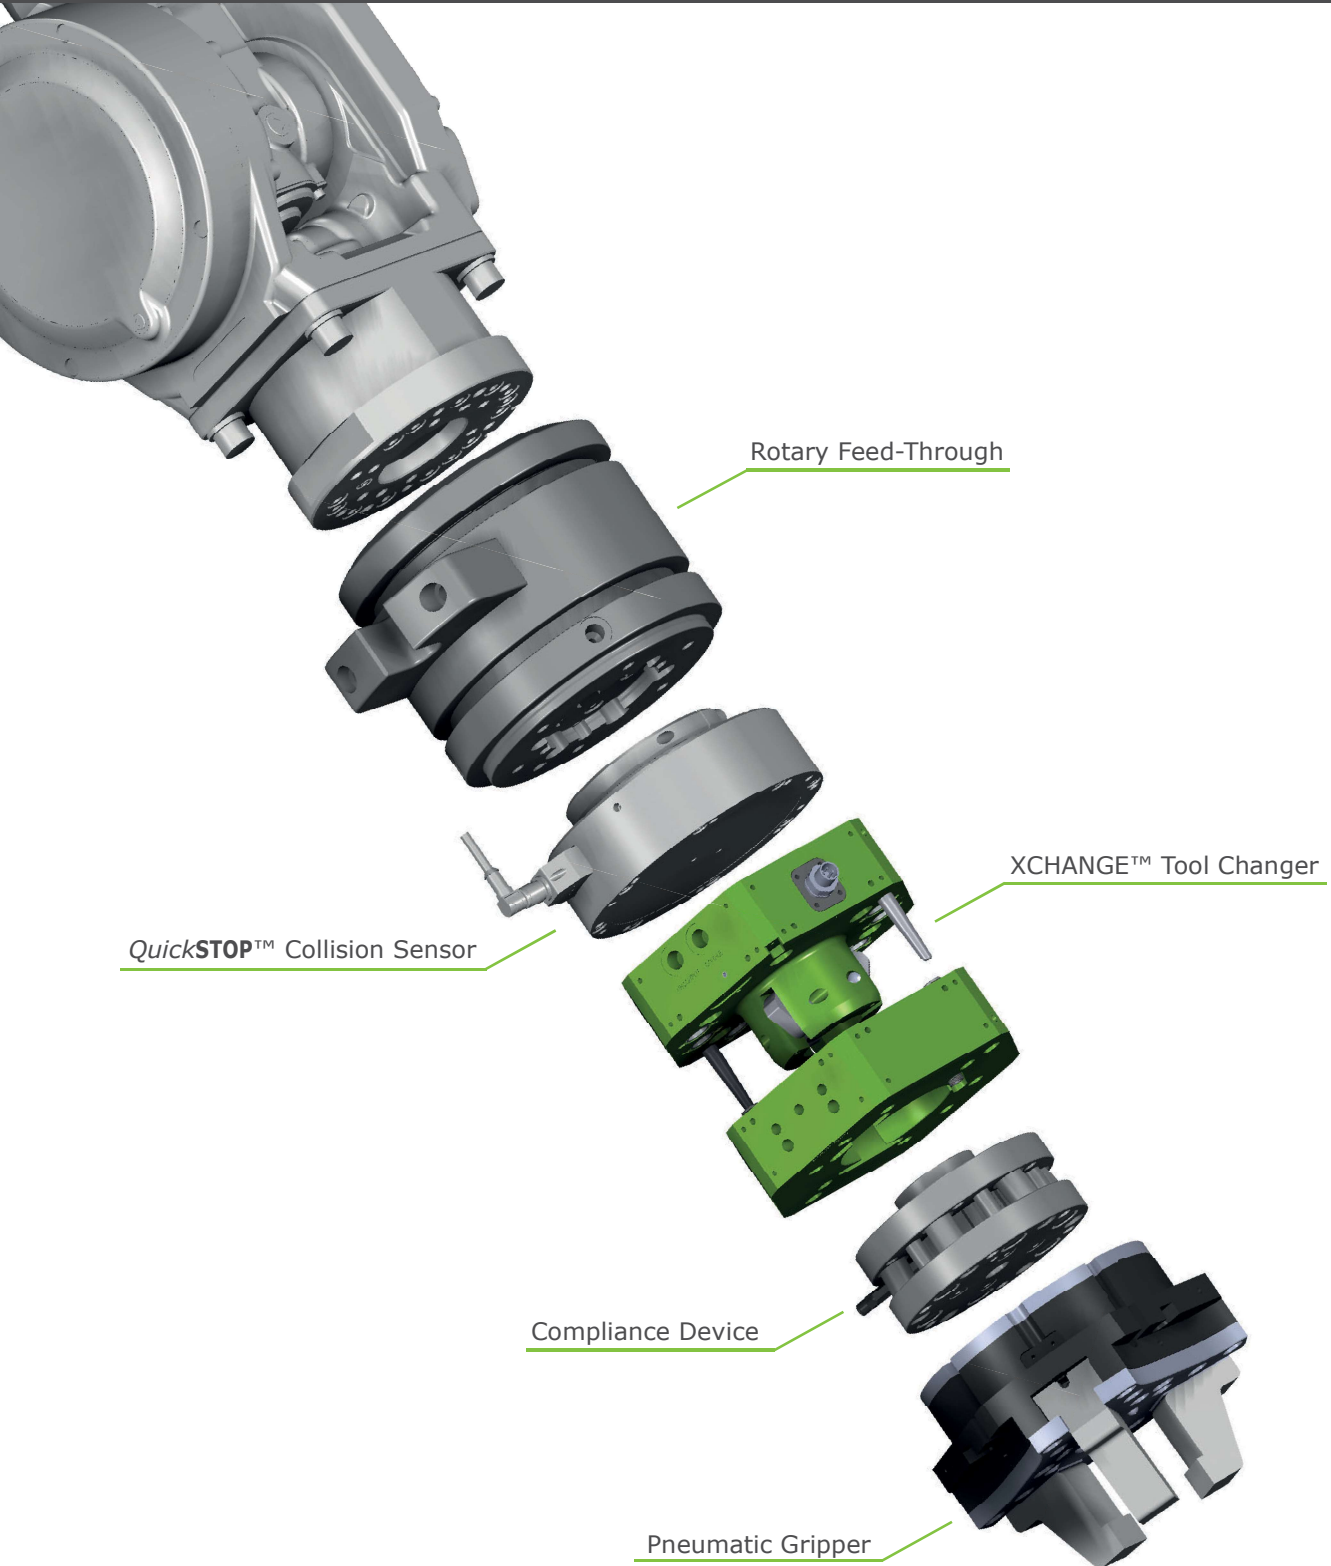

# TABLE OF CONTENTS

1	Pneumatic Grippers		2
2	Electric Grippers		16
3	Palletizing Grippers		19
4	Robot Components		20
5	Pneumatic Swivel Units		21
6	Tool Changers		22
7	Docking Technology		34
8	Collision Sensors		35
9	Compliance Devices		36
10	Deburring and Finishing Tools		40

1	Self-centering Vises		48
2	Facing Heads		53
3	Indexing Chucks		54
4	Tooling for Machining Centers		56
