

DATRIA

MEMBER OF RADKA GROUP

OUR PRODUCTION

EXTRUDERS

We produce modern **single-screw extruders**, which excel in high performance, reliability, and low consumption of electric energy.

NEW: Mobile application for controlling of extrusion lines from any position!

Gravimetric dosing unit TSM with vacuum loaders and with extraordinary accuracy

Control panel with line visualisation

Synchronous servo motor Baumüller and gearbox Zambello with long lifetime

Optimized heating zones ETB with AEROGEL insulation

Analog or PLC control B&R with DEXTRUSION software

Easy service provided by connectors

EXTRUSION LINES

Extrusion lines for production of profiles and tubes from thermoplastics and biodegradable materials.

REGRANULATION LINES

We produce regranulation lines for production of standard granules and microgranules made of PA, PE, PP, PC and others.

The regranulation line excels in low energy consumption, high performance and long lifetime of all used components.

**OUR INDIVIDUAL
APPROACH TO EVERY
CUSTOMER AND A
SERVICE, WHICH NO ONE
ELSE OFFERS 24/7!**
