

INCOVERS SAVING UP TO 60% OF ENERGY

DATRIA
MEMBER OF RADKA GROUP

Thermal insulation covers

BENEFITS OF THERMAL INSULATION COVERS

- Significant energy consumption reduction
- Easy and quick installation
- Custom made
- Quick return of investment
- Reduction of ambient temperature
- Dustiness reduction

High temperature outer fabric to 550°C with PTFE coating.

Insulating filler from ceramic material with high density in thickness 20 mm or 40 mm. Thermal conductivity at 400°C only 0,09 W/mK.

Inner glass fabric to 700°C reinforced with a steel fiber.

Straps with metal buckles for easy and fast manipulation.

Insulating filler also available with an innovative material Aerogel in thickness 10 mm. Thermal conductivity at 400°C only 0,04 W/mK.

SUITABLE FOR

- Injection machines
- Extruders
- Flat dies
- Furnaces
- Moulds
- and more...
