1.5 M MULTI-BAND FLYAWAY TERMINAL

MFT 1500 MANUAL KU-BAND

ROBUST, COMPACT, MIL QUALIFIED

This easily deployable multi-band modular FlyAway satellite terminal MFT 1500 supports your missions and is the terminal of choice!

The MFT 1500 terminal distinguishes itself through its operational wind resiliency and military grade design: it can withstand and operate under very high wind speeds and during severe storms comparable to deployable ground station requirements, nevertheless it is optimized for portability and product longevity.

The MFT 1500 Ku-Band is the non-motorized terminal platform and is designed for most demanding environmental requirements.

Carbon is used wherever possible to reduce weight, enhance durability, and provide the extreme stiffness required for optional Ka-Band upgrade in high wind conditions. Both the unique 180° azimuth range and integrated feed-booms for various bands expedite setup and use. All fasteners, caps, and protection use captive hardware.

With its rapid band switching capability with optional feeds for X- and Ka-band RF transmissions and integrated SKYWAN 5G modem, it provides utmost versatility and flexibility and can meet almost all network requirements.
