

WUZETEM is a global supplier of steel precision components for vehicles, machinery and equipment. It offers comprehensive solutions in the area of precision mechanics for manufacturers and distributors from the automotive industry, agricultural business, military sector and heavy industry. The company specialises in the production of high-quality nozzles, injectors and plungers. It has modern machinery and equipment, an R&D laboratory and an experienced team of engineers. The company has been in business continuously for more than 70 years, and its products can be found in 33 countries in the world.

WUZETEM

HIGHEST PRECISION

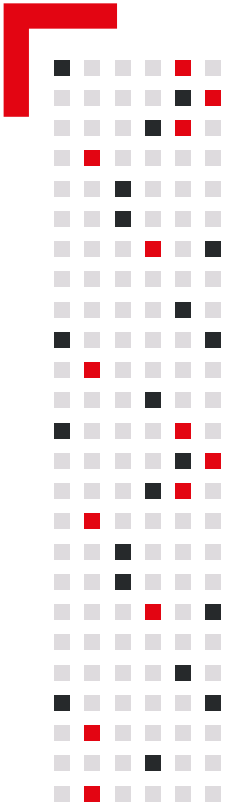

OUR OFFER:

- ✓ **Production** of fuel injectors for tanks (T-72 and PT-91) and infantry fighting vehicles (BWP-1). We use DLC technology (diamond-like carbon coatings), thanks to which the injectors are more resistant to factors, i.e. friction, high and low temperatures, corrosion. The elements are also characterized by high durability.
- ✓ **Regeneration** of used injectors and nozzles. The use of appropriate technologies allows you to restore the original parameters of a given element at a much lower cost than in the case of manufacturing a new injector from scratch.

Licence (Concession) of the Ministry of the Interior and Administration for the production and trade in explosives, weapons, ammunition and products and technology for military or police purposes.

- ✓ **Reverse engineering.** We manufacture elements for the most modern engines, including those used in new generation vehicles, based on the documentation provided by the client.
- ✓ **Precision mechanics.** We specialize in the production of technologically advanced elements for the defense industry, heavy industry, military aviation, civil aviation, applicable in drones, elements of guidance heads and fuses. We guarantee the accuracy of execution below a micrometer.

Licence (Concession) of the Ministry of the Interior and Administration for the production and trade in explosives, weapons, ammunition and products and technology for military or police purposes.
