- Kindness and empowerment with **no middle management**
- **Encouraging** and offering **flexible** working hours and place.

# The Nicomatic Group family history

**1976**

Paul Nicollin opens Nicomatic in Bons-en-Chablais, France

Creation of **Nicomatic**

**1984**

The industry observes a growing customer base in need of direct interaction internationally

The company begins trading directly with international customers

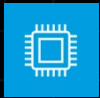

**2008**

The market faces new customer demand for customizable products, a rising need previously unmet by the market

The company creates a new division focused on custom projects tailored to specific customer needs and begins selling customized products

# The Nicomatic Group family history

**2018**

Customers demand complete electronic systems rather than just interconnect solutions.

Nicomatic begins designing custom projects integrating electronics, moving up the value chain

**2021**

The industry observes an increasing customer demand for more and more complete systems

Acquisition of **Oxytronic**, integrating an electronic systems capability in-house

**2022**

The market faces a growing customer need of distribution and consulting offers

Acquisition of **Accurate**, offering distribution and consulting activities

**2023**

Customers demand fully serviced, complete solutions delivered through an efficient value chain

Formation of **Nicomatic Group**

# Building relationships is in our DNA

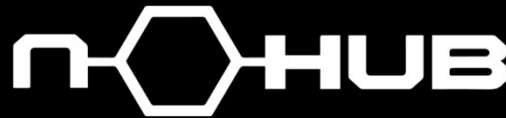

Nicomatic Group is able to work on different dimensions to provide solutions

## Internal

and more...

## Partners

→  
The nHub concept permits access to resources & skills of our main partners to provide wider solutions to our customer base

## External

# Feedback received from different markets

“It is comforting working with professional supplier having such high level of expertise.”

“We chose to work together because of the quality and reliability of the products offered.”

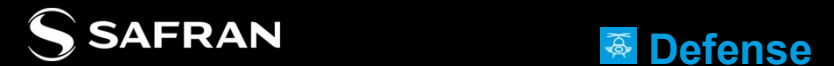

“The DMM-series was chosen due to its small form factor, metallic shell, and backshell availability now integrated for a minimum length of the final cable assembly.”

“Thank you again for the good conduct of the actions.”

“Thank you everyone who has worked to get this done in such a short time, highly appreciated from our side and very well done!”

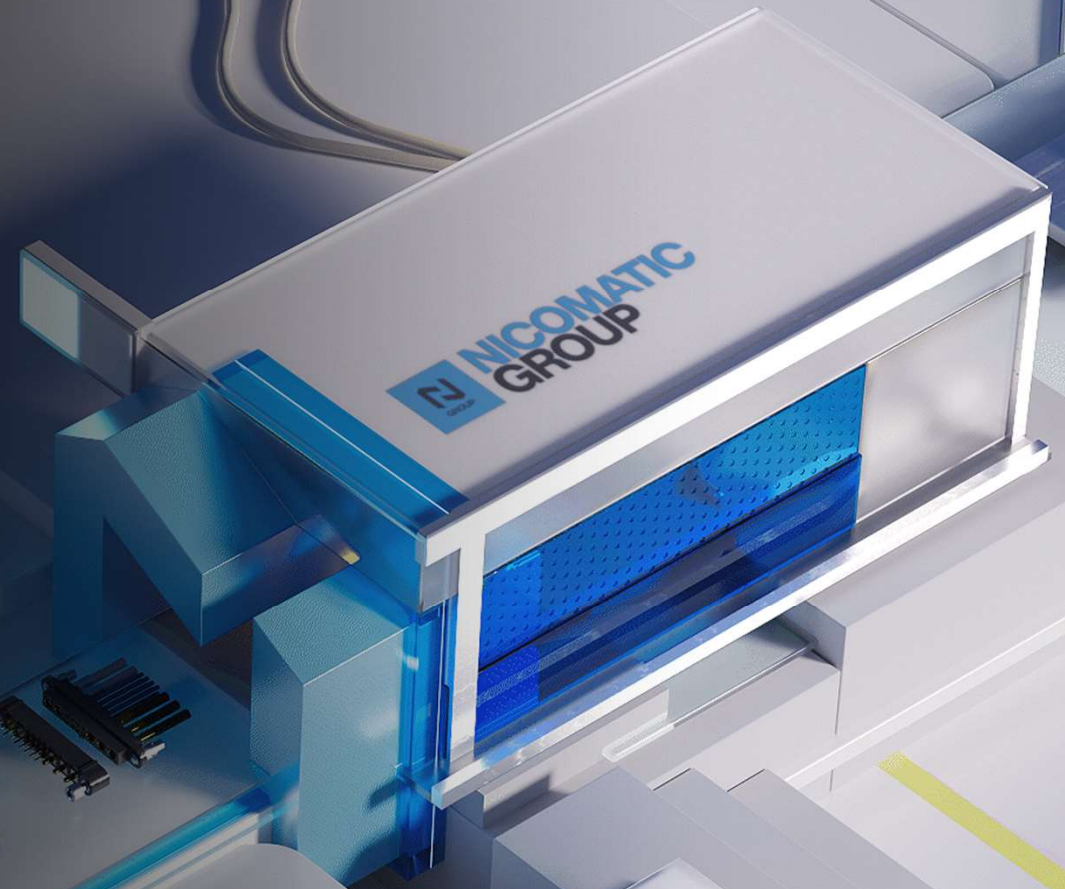

“Their understanding of electronic equipment manufacturers needs is aligned with their robust processes and expertise.”

# Interconnect

Nicomatic Group creates **interconnect** solutions for harsh environments.

Being all about connections, everyday Nicomatic Group empowers the link between humans and machines to bring the future a little bit closer.

We believe that combining machines' precision with the human spirit and creativity can drive real change. Change from the perspective of our customers, our team and the industry.

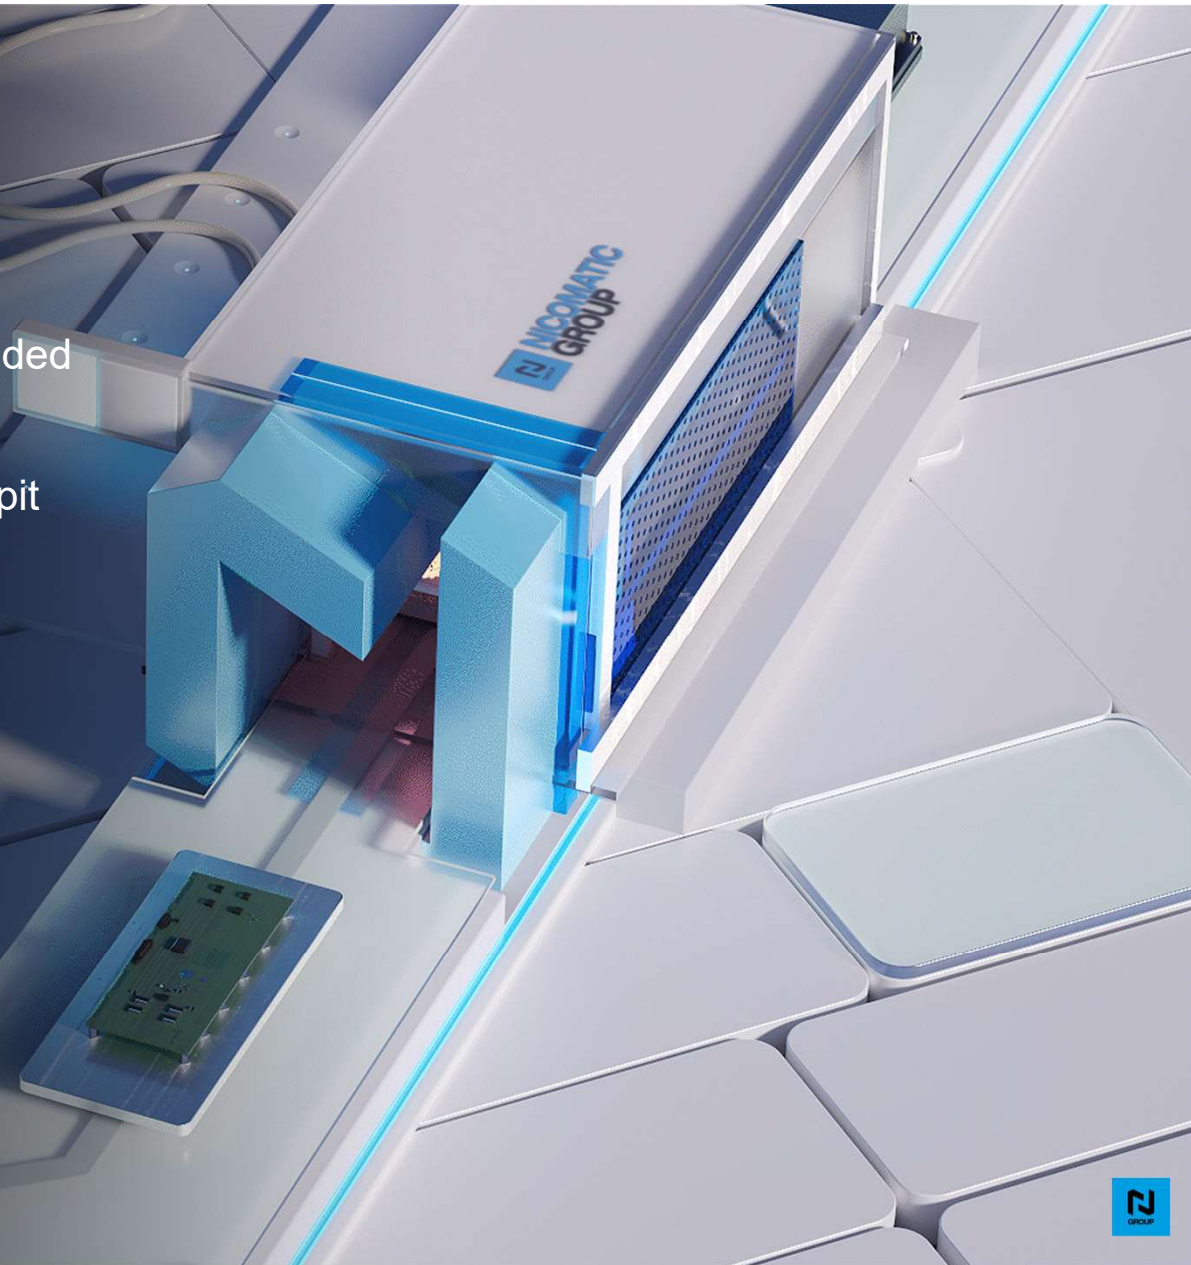

# Electronic

Nicomatic Group designs and manufactures embedded **electronic** equipment.

Providing bespoke solutions from products for cockpit equipment and Cabin Management Systems to the most advanced signal processing applications.

We believe that our value is within customer-tailor-made electronic solutions with a high level of agility and expertise.

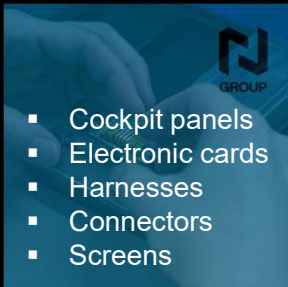

# Services

Nicomatic Group is a trusted supplier of **services** and solutions for rugged tactical power, signal and computer & boxes needs for critical environments.

Being close to our customers worldwide, we are engaged in the whole process – from concept to after-market support.

We believe that our solid knowledge and extensive experience in technical sales, construction and project management are valuable to share.
