

DEFENSE AND SECURITY PACKAGING

HEAVY-DUTY SOLUTIONS

UN CERTIFIED & CUSTOMIZED

Nefab designs and manufactures complete packaging solutions that provide solid protection during transport, storage, and in the field. We develop lightweight, high-quality solutions that save resources throughout the entire supply chain.

Our packaging solutions have been tested and approved according to various military specifications. We are a tier-one supplier for some of the largest NATO military forces in the world, offering a multitude of defense packaging solutions.

Nefab holds numerous certifications for dangerous goods, covering more than 600 different boxes, all of which are accredited according to UN standards.

UN CERTIFIED PACKAGING SOLUTIONS

- Over 600 certifications according to UN standards.
- Design capabilities for new certifications.
- Solutions compliant with: UN and NATO (Stanag), MIL-STD & MIL-SPEC, ASTM/ISTA, NEN, and ISO.

REDUCED TOTAL COST & CO₂ EMISSIONS

- Our packaging solutions are developed in close collaboration with customers to minimize cost.
- Reducing the impact that our solutions have on the environment.
- Lightweight boxes consume less fuel in transport and reduce CO₂ emissions.

SAFE DELIVERIES & EFFICIENT HANDLING

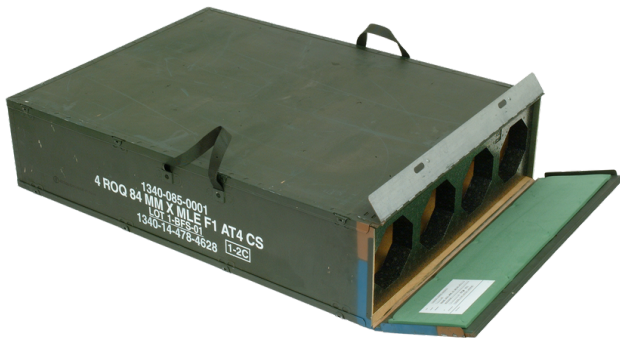

- Lightweight solutions for efficient handling.
- High-quality solutions to ensure safe deliveries.
- Complete packaging solutions for all your needs.

ABOUT NEFAB

Solutions for Defense Packaging

All boxes, as outer packaging, or together with internal packaging, make up complete packaging solutions. To determine if our approved solutions can be used with your product, we will first investigate if the material of this dangerous goods class is approved to send with your intended method of transportation. Then, we will calculate the gross weight of the shipment and see if we have an approved dangerous goods certificate that matches your product.

Design capabilities

With Nefab's worldwide engineering resources, which include several ISTA certified test labs, we can provide complete packaging solutions and services on a global scale. If there is no pre-approved packaging which fully accommodates your product, Nefab can develop a new type of packaging. Due to the stringent requirements stipulated by the UN and NATO, the developed solution must go through a type approval test before it can be used to ship these goods. Other services, such as lab testing, contract logistics or digital services complete our wide range of solutions.

We save environmental and financial resources by optimizing supply chains. It's about innovating together to create smarter packaging and logistics solutions while always respecting people and ethical standards. This contributes to a better tomorrow for our customers, for society and for the environment.
