# Industrial Spring a class of its own

## The Electronics and Automation Expo at the 2024 Industrial Spring

The "Industrial Spring" is the most important industry meeting held cyclically in Kielce exhibition and congress centre. TEiA Electronics and Automation Expo has perfectly complemented the offer of the industrial events series at Targi Kielce. For several years, industrial electronics products, composites and chemicals for electronics, as well as electronic parts and components and microcontrollers, have been showcased at the expo.

Almost all Industrial Spring exhibitors unanimously point out that **the most important thing is the quality of contacts they win at the expo. The value of contracts resulting from talk-shop sessions is also crucial. The meetings were highly satisfying - this opinion was unanimously shared by almost all exhibitors.**
