ABOUT US

Aviaservice-Kiev LLC by a team of aviation professionals working in the market since 2003.

To date, our staff has successfully upgraded more than 150 aircrafts and helicopters to install radio communications, instrumentation and navigation equipment, as well as to install special systems to improve flight safety (airborne collision warning systems and ground warning systems, emergency beacons and means of objective control).

Our organization has participated in implementation of international projects for the maintenance and modernization of aircraft numerous times.

Aviaservice-Kiev LLC has a Part-145 Certificate for the Maintenance of AT and its components No.UA.145-0081 and a Part-21 Certificate of the AT Developer No.UA.21J.030 for the right to independently develop Design Documentation and Operational Technical Documentation for aircraft modernization.

In 2019, Aviaservice-Kiev LLC received the ISO 9001:2015 Certificate and ISO 9001:2015 IDT Certificate.

In 2020, Aviaservice-Kiev LLC received accreditation from the State Service of Export Control of Ukraine to conduct foreign economic activities in the field of aviation.

The specialists of Aviaservice-Kiev LLC developed and got approval by the Aviation Administration of Ukraine for the Design documentation to make major changes in the design of the aircraft type of Il-76, Il-78, Yak-40, An-140-100, An-12, DC-9 (MD-82), Boeing 737, Boeing 767, helicopter type of Mi-8, Mi-17, Ka-32.

Another area of activity of Aviaservice-Kiev LLC is the wholesale supply of aviation equipment and aviation components, as well as the selection and sale of aviation components on order for aircrafts type Il-76, An-26 and Mi-8, Ka-32 type helicopters.

Among our main customers are: State Aviation Enterprise "Ukraine", Ministry of Defense of Ukraine, enterprises of Ukroboronprom, SC "Ukrspesexport", SC "SpetsTechnoExport", etc.

MODERNIZATION

Aviaservice-Kiev LLC is certified as a Maintenance Organization Part-145 No. UA.145.0081 and a Design Organization for Developing Aviation Equipment Part-21 No. UA.21J.0030.

Aviaservice-Kiev LLC possesses engineering, labor resources and material and technical capabilities for modernization of aircraft types Il-76, An-26, and helicopter types Mi-8, Mi-17, Ka-32.

Our organization provides the following types of technical services for aircraft types Il-76, An-26, and helicopter types Mi-8, Mi-17, Ka-32:

- extension of aircraft resources;
- selection and supply of apparatus and equipment;
- installation of instrumentation equipment;
- installation of radio communication equipment;
- installation of radio navigation equipment;
- installation of radar equipment;
- installation of satellite navigation systems;
- installation of satellite communication systems;
- installation of airplane collision avoidance systems (TCAS, ACAS-2);
- installation of ground collision warning systems (TAWS, EGPWS);
- installation of automatic dependent surveillance systems (ADS-B);
- installation of oxygen equipment;
- installation of objective control systems;
- installation of emergency beacons;
- comprehensive modernization of instrumental, navigation and radio communication equipment.

On DC-9 (MD-82), BOEING aircrafts we carry out re-equipment and salons design.

All works (on aircraft modification) are accompanied by the approved Design and Operational technical documentation. We offer installation of equipment and / or development of documentation for major and minor changes to the standard design.

SUPPLY

The company "Aviaservice-Kiev" supplies aviation equipment. We can deliver equipment to any part of the world, with the exception of countries under international sanctions, as well as the Russian Federation.

Aviaservice-Kiev LLC is accredited by the State Export Control Service of Ukraine to conduct foreign economic activities in the field of aviation.

It is possible to deliver the following types of aviation equipment:

emergency radio beacons, transmission units, oxygen equipment, control and testing equipment, multifunctional systems, weather radars, navigation equipment, main and tail rotor, equipment of hydraulic systems, equipment for aircraft control systems, power supply equipment, equipment for special purposes (UPAZ, etc.), equipment for ground and airfield services, main and auxiliary power units, instrumentation equipment, firefighting equipment, radio navigation equipment, radio engineering equipment, technical lighting equipment, objective control systems, airborne collision avoidance systems, systems for preventing collisions with the ground, fuel equipment, fuel valves, chassis assembly, as well as individual elements, airframe elements.
