# Product and service update

## September 2023

### EcoHeat Technologies cast iron grates

*Establishing a new manufacturing department for cast iron grates - designed for biomass furnaces.*

Starting from summer 2023 EcoHeat has expanded on provided services and products and now offers manufacturing of cast iron grates for biomass furnaces according to:

- ***specifications provided by client;***  
OR
- ***by creating brand new 3D design, forming and defining the product based on customer needs***

One of the key factors that set EcoHeat cast iron grates apart from similar products is chemical composition. We ensure that each grate is manufactured with a high chromium content (from 25% up to 32%), a critical element that significantly contributes to longevity of use.

This not only enhances the durability of the grates but also plays a crucial role in resisting corrosion and wear, reduces environmental impact of heating systems.

EcoHeat grates guarantee a high-quality combustion process in numerous boiler houses operated by Latvia's major heat providers.
