BUTTI

RECYCLING EQUIPMENT MANUFACTURERS & COMPANIES

Butti is **specialized in manufacturing** Recycling, Materials Handling, Construction Equipment. With more than **35 years of experience** in this field, we have succeeded in transmitting through the world our branding, our spirit of innovation.

RECYCLING

WORLDWIDE

100%
MADE in
ITALY

BUTTI

Today, our reach extends across many countries, spread over 5 continents.

RESEARCH AND DEVELOPMENT

Butti facilities is focused on the development of new innovations to expand sustainable and intelligent solutions, primarily equipment for recyclers and not only.

We are applied with qualified **skilled technicians** to deploy innovative solutions and to provide **qualified assistance** to our customers. We're also able to conceive, design and supply **custom-made**

BUTTI

SOME OF OUR HIGH LIGHTS: TIPPING SKIPS,
FORKLIFT SWEEPER, MAGNETIC BROOM,
ELECTRIC ENGINE CRUSHER, CAIMAN SHEAR,
VERTICAL BALERS MACHINE - BALE COMPACTOR.

TIPPING CONTAINERS

from capacity 280 Lt to 2300 Lt

Our range of heavy-duty **tipping skips** and self-tipping forklift skips also known as roll forward skips, allow you to **transport waste** material out of the **facility** to a waste compactor, in a more efficient and **safe** manner than removing it by hand, using a forklift truck.

If you want to see how it works, log into our website. A video is available.

TIPPING CONTAINERS

from capacity 280 Lt to 2300 Lt

SECURE SYSTEM

Unlike the others, Butti tipping skips have other **special features supplied** as standard (Release device - draining screw plug – noiseless wheel – galvanised metal sheet on a settling tank - half round steel support to **protect** the wheel on closing the tipping bucket. Butti has also developed the new system (**SECURE SYSTEM**) is a **hydraulic system** that can be supplied upon request.

The system can **guarantee lifespan** for both forklift and containers by allowing a **gradual and progressive tipping** without violent backlashes or accidental falls.

FORKLIFT SWEEPER

with polypropylene brushes
or steel brushes

Our forklift fork mounted sweeper broom is a quick and easy solution for collecting your loose granule products such as sand, top soil, swarf, scrap or similar. It is the must have tool that gives you the versatility of clearing your yard, roadway, footpaths or warehouse.

Butti Industrial Brooms are made with **two types of brushes:** **INDUSTRIAL** (Steel Brushes) and **ECO** (Polypropylene brushes). Both brooms with steel or with polypropylene brushes are splitted into **2 categories** which are the following:

INDUSTRIAL AND ECO STRONG FOR INTENSIVE USE

INDUSTRIAL BROOM STEEL BRUSHES

ECO STRONG BROOM POLYPROPYLENE BRUSHES

If you want to see how it works – Log into our website. A video is available.

UNIVERSAL AND ECO UNIVERSAL FOR LESS INTENSIVE USE

**UNIVERSAL BROOM
STEEL BRUSHES**

**ECO UNIVERSAL BROOM
POLYPROPYLENE
BRUSHES**

If you want to see how it works – Log into our website. A video is available.

FORKLIFT MAGNETIC

size mm 1500 – 2500 - 3000

BUTTI present a superb range of **Magnetic Sweepers** available in a range of **sizes and styles** perfect for clearing **small ferrous metal objects**, such as nails, tacks, nuts, bolts, screws etc... from the floor. **We manufacture** our Magnetic Sweepers in Italy and produce Forklift Mounted and **Handheld Sweepers**.

Applied with an easy opening system by an opening lever.

If you want to see how it works, log into our website.
A video is available.

ELECTRIC ENGINE CRUSHER

The machine is designed to break the case of the electric engines from diameter 280 to 400 mm, to cut stators and transformers. By crushing the engines and gear boxes you can easily separate the valuable copper from the steel.

If you want to see how it works, log into our website. A video is available.

IT IS A MODULAR MACHINE IN 3 WORKSTATIONS:

- 1) Crush the carter
Workstation
- 2) Copper extraction by
ejection, Workstation
- 3) Copper extraction
by means of clamp
Workstation.

WORK SAFE

CAIMAN SHEAR

BUTTI Caiman shear is a good solution for cutting all ferrous waste materials and particularly for reducing the volume of steel and other metals. It features 4-edge blades driven by a special hardened steel hydraulic cylinder that allows high productivity at low costs. It also shows a new standard in terms of safety at work since it sets a special mobile and fixed protection to prevent accident during cutting operation.

the machine is designed for a **cutting capacity** from 27 SP 4 to 100 SP 6.

If you want to see how it works, log into our website. A video is available.

thank for your attention
