

Partnerships in mould care management

Formy Tachov is widely experienced in mould making of high-quality injection moulds for thermoplastics up to 20 ton for more than 50 years. We will turn your idea into reality with the help of an experienced team of experts, state-of-the-art technical equipment, years of experience and innovative know-how.

We will also take care of your moulds they have been produced by other manufacturers and help you solve all your problems.

We offer 2nd stage support for moulds produced in China or other countries up to weight 30 ton.

Products out of our moulds can be found in:

- automotive
- transport containers and crates
- technical parts

Formy Tachov dispose of a team of more than 110 highly skilled employees and produces on the area of about 6.600 m²

Our goal is customer satisfaction, long-term cooperation, professional communication and a mutually beneficial partnership.
