

# STRIVING FOR A SUSTAINABLE FUTURE

**fff** RECYCLE  
FOR FUTURE

# PROTECTING OUR PLANET

We are passionate about environmental protection and support the global commitment to reduce the impact on the environment caused by the unnecessary disposal of recyclable plastics.

- Zero landfill policy
- Environmentally sustainable solutions
- Providing high quality recycling solutions

We specialise in the recovery, recycling and reprocessing of a wide range of plastics. Our recycled plastic granulate and compound is an excellent way to reduce the need for virgin materials and to promote sustainability in the manufacturing process. It also helps to reduce waste by giving new life to materials that might otherwise end up in landfills or the ocean.

## GOAL

Our goal is to create a world where plastic is seen not as waste, but as a valuable resource that can be reused and repurposed to benefit both the environment and society.

## VALUES

- Committed to delivering excellent customer care.
- Regular monitoring of quality services.
- Continual improvement in services through customer feedback.
- Tailored service packages to reflect individual customer requirements.
- We seek honesty and excellence to bring out the best.

## CONSISTANT QUALITY

We understand the importance of a reliable source of high-quality recycled content to ensure that the end products meet the necessary specifications and standards.

We provide consistent high-quality recycled content and ensuring it is supplied to you on a regular basis.

RECYCLE FOR  
FUTURE

## WE RECYCLE

Quality is key for all manufacturers and as we process regrinds at our UK facility, quality control and consistency to your specification is always guaranteed with us.

## WE TRADE

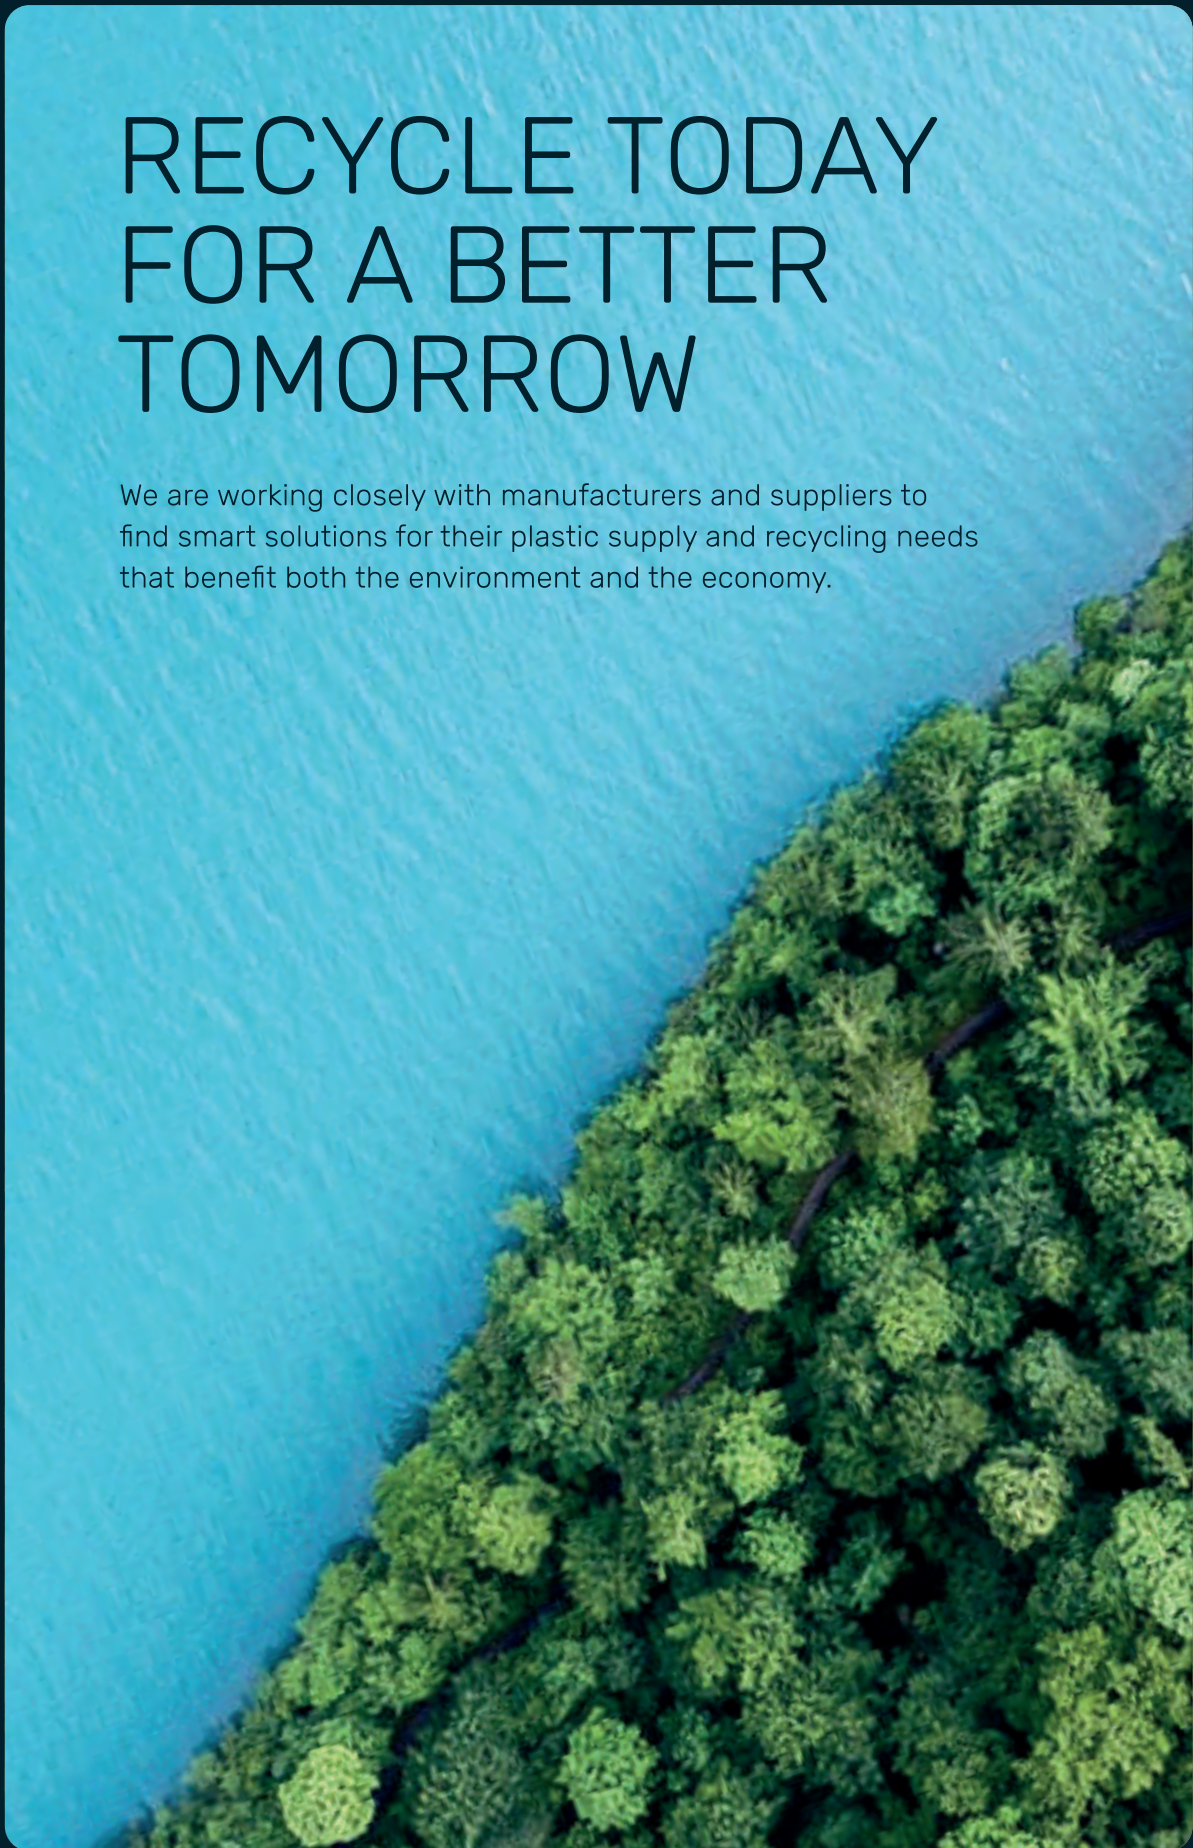

Our global team of experts operate across the world so buying and selling recyclable plastic with us is a simple and seamless experience.

## COLLECTION GRINDING COMPUNDING

- HDPE
- LDPE
- ABS
