

TECNOFER[®]

RECYCLING EQUIPMENT & MACHINERY

ANALYSIS, PROJECT DESIGN, CONSTRUCTION AND ASSISTANCE

LONG-LASTING VALUES THAT YOU WILL EXPERIENCE WITH TECNOFER TECHNOLOGY

ADVANTAGES & FEATURES

OF TECNOFER RECYCLING TECHNOLOGY

From feasibility study to tailored project/plant

Sturdy built equipment

Automation & process control

- Lower utility cost
- Maximum efficiency
- Remote real time assistance and control by router VPN
- Higher safety standard
- User-friendly interface

3D customized equipment design

Low maintenance interventions

Start up, training and post-sale assistance

PET LINE

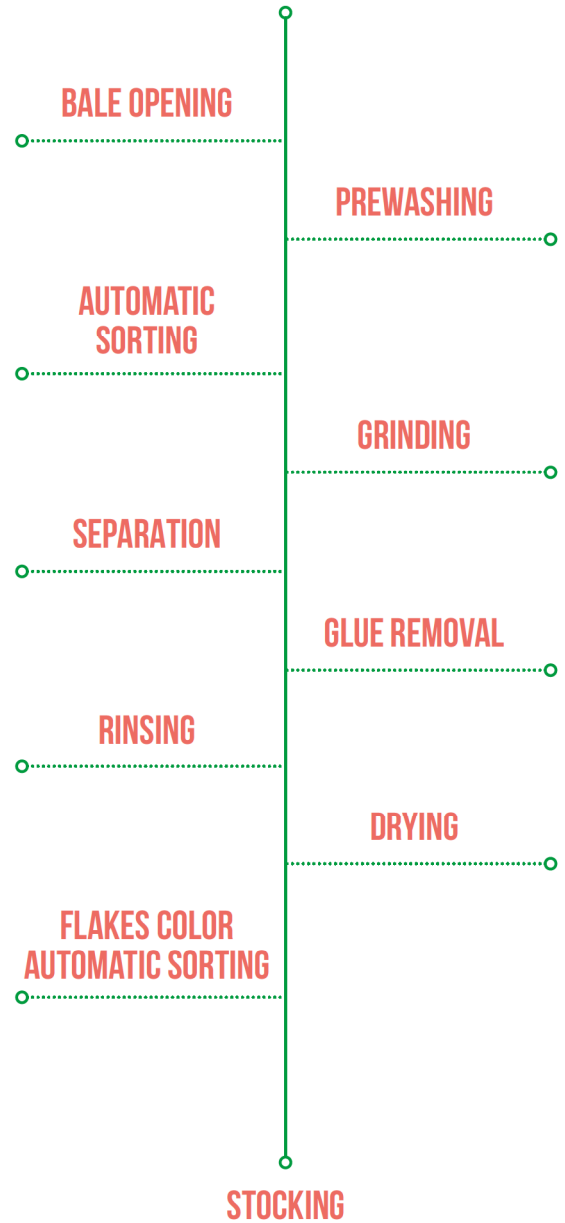

Complete washing lines for PET bottles

food grade applications "Bottle-to-Bottle"

fiber

strapping

sheet

FILM LINE

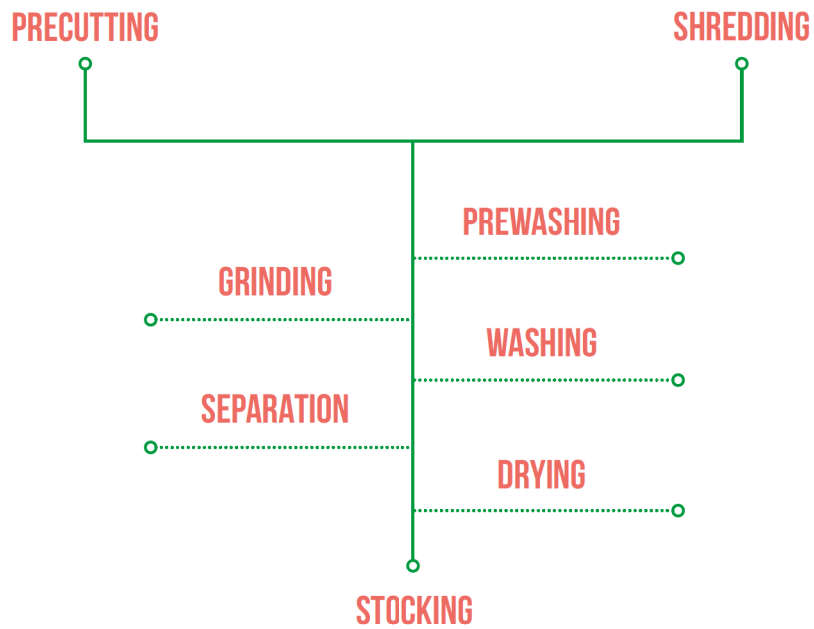

Complete washing lines
for LDPE-LLDPE-HDPE-PP film

post consumer
post industrial
agricultural
woven bags
ropes

HDPE-PP LINE

Complete washing lines
for rigid HDPE-PP

bottles
crates
drums
pipes
car bumpers, batteries

SPECIAL APPLICATIONS

Plastics coming from paper-mill industry

Light metals

Special waste both dangerous and non dangerous

Tetra Pak and food packing

Separation of packing from the food contained

Absorbent hygiene products (AHP) and recovery of fine components

Partial dehydration of the wet waste from the sorted collection
