1. Our history

WEREMCZUK is a well-known brand of machines for fruit and vegetables, available both on the Polish and foreign markets. The company was established in 1981 on the initiative of engineers Danuta and Józef Weremczuk, whose goal was to create innovative equipment supporting Polish farmers. The first success was the JOANNA currant harvester, which significantly facilitated fruit harvesting.

Since then, the company has been developing dynamically, introducing more and more machines with various applications to the market. WEREMCZUK offers modern solutions for fruit and vegetable producers. The machines have been awarded many times at international agricultural exhibitions and have gained the trust of customers around the world.

Today, the company's offer includes machines for harvesting, cultivation and care of plantations and orchards, which are characterized by high quality and reliability. The WEREMCZUK company is constantly developing its technologies to provide farmers with the best possible support in their daily work.

The continuous development of the company and products, participation in EU projects and expansion into foreign markets determined the need to refresh the line of vegetable machines. While implementing the EU project on design, a decision was made to change the brand name for the group of vegetable machines to WERINGEN. We also decided to change the colors and design of the machines produced. Weremczuk Agromachines remains the manufacturer and distributor of the WERINGEN brand.

Over the years, Weremczuk Agromachines has gained the recognition and trust of customers from all over the world. That is why we are convinced that the WERINGEN brand will be a continuation of our dynamic development. What is more, it will maintain the position of a leader in the field of innovative agricultural machines that it has developed over the years. That is why the motto of the WERINGEN brand is:

**Farming made effortless.
Discover the difference.**

2. Our mission

Our mission is to provide farmers with the best solutions that make their work easier and more efficient. Many of our employees are also farmers, so we understand the needs of our customers and value their involvement.

Our business is based on values such as honesty, innovation and customer care. Thanks to this, we have gained the trust of thousands of users around the world. We focus on creating modern technologies that respond to the changing needs of the market.

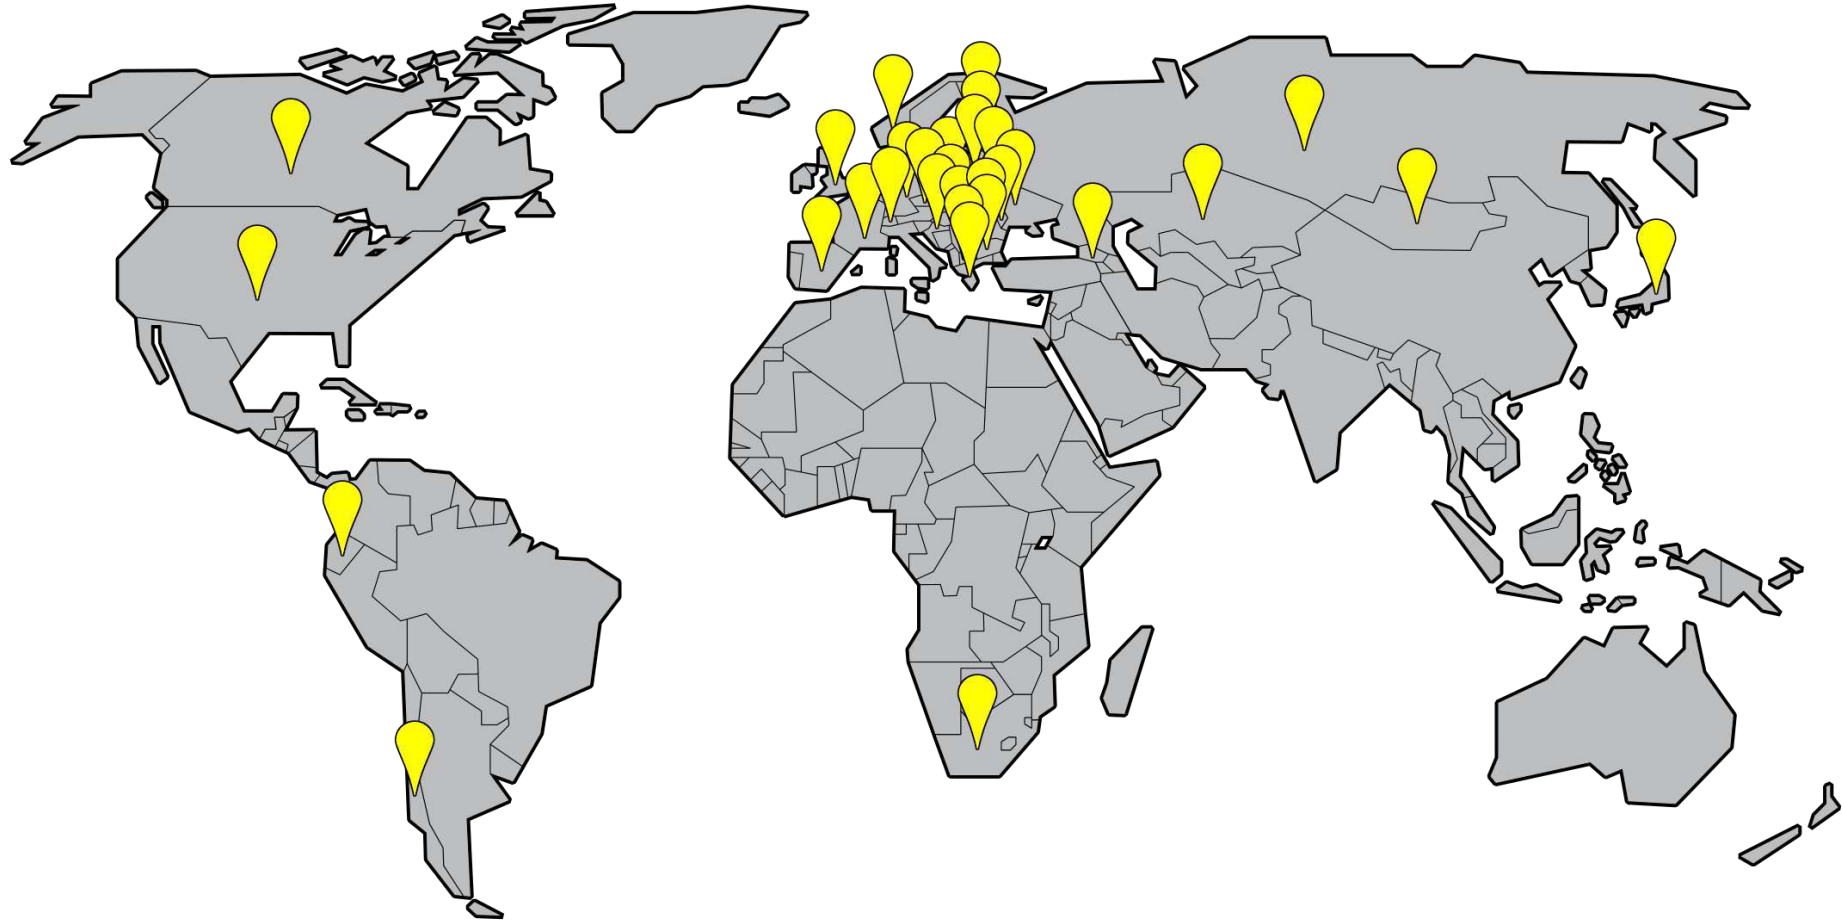

We develop sustainable and automated solutions that minimize machine maintenance and increase production profitability. The professionalism and commitment of our team are the driving force that allows us to strengthen the brand's position in the global market.

3. Why us?

- ➔ Over 40 years of experience in manufacturing farm equipment
- ➔ Own R&D department
- ➔ Full production cycle in-house
- ➔ Bespoke solutions for customers
- ➔ Dedication and trust as core values
- ➔ Innovative and trendsetting machines
- ➔ Post-sale customer care
- ➔ Full spare parts availability

Where are we in the world?

4. WEREMCZUK products line

- ➔ **Joanna-5 Classic & Joanna-5 Premium** half-row harvesters
- ➔ **FELIX & FELIX/Z** full-row harvesters
- ➔ **MAJA Classic & Automatic** shaking and cleaning machines
- ➔ **KAREN** full-row harvester
- ➔ **VICTOR & VICTOR/Z** full-row harvester
- ➔ **NATALIA-V** full-row harvester
- ➔ **SAMSON** roots shredder
- ➔ **SAVA** multi-functional machine
- ➔ **ROCH** shoots cutter

JOANNA-5 Classic & Premium

- ✓ Half-row, tow-behind harvester
- ✓ Suitable for harvesting currant, chokeberry, gooseberry, raspberry, rosehip, haskap and saskatoon
- ✓ Efficient and user-friendly harvester
- ✓ Adjustable shaking amplitude for harvesting different types of fruit
- ✓ Shaking discs movable on the pipe - possibility of harvesting even from low-fruited bushes
- ✓ Modular construction - wide range of additional equipment available
- ✓ Watch Joanna-5 Premium at work here → [YouTube](#)

FELIX & FELIX/Z

- ✓ Full-row, tow-behind or self-propelled harvester
- ✓ Suitable for harvesting cherries, plums, apples for processing, olives and other stone fruits
- ✓ Solution dedicated for large-acreage farms
- ✓ Efficient sealing system minimizing fruit losses
- ✓ Possibility of harvesting into small, 10-20 kg boxes or 500 kg big boxes
- ✓ Available with working decks or rollers/lifts for big boxes
- ✓ Available with 2 or 4 shaking heads
- ✓ Available with a conveyor transporting fruit to the second row
- ✓ Watch FELIX/Z at work here →

MAJA Classic & Automatic

- ✓ Tow-behind one-row shaking and cleaning machine
- ✓ Suitable for harvesting cherries, plums, apples, olives, almonds, pistachios, nuts and other stone fruit
- ✓ Screen extended manually (min. 2 people required – Classic version) or automatically (by a tractor driver using a joystick – Automatic version)
- ✓ Different machine lengths and screen sizes available to better suit your needs
- ✓ Equipped with a cleaning unit with a fan – higher quality of the final produce
- ✓ Watch Maja Automatic LTA at work here → [YouTube](#)

KAREN

- ✓ Full-row, tow-behind harvester
- ✓ Suitable for harvesting blueberries, blackberries, raspberries and haskap (honeyberry)
- ✓ Cleaning unit with a fan - removing leaves and debris
- ✓ Efficient sealing system minimizing fruit losses
- ✓ Sorting zone for even better quality of the final produce
- ✓ Capacious work platforms for empty and full boxes
- ✓ Watch KAREN at work here → [YouTube](#)

VICTOR & VICTOR/Z

- ✓ Full-row, tow-behind or self-propelled harvester
- ✓ Suitable for harvesting currants, chokeberry, gooseberry, rosehip and other berry fruits
- ✓ Self-propelled harvester also available in Premium version with enclosed cabin with air conditioning
- ✓ Solution dedicated for large-acreage farms
- ✓ Possibility of harvesting into small, 10-20 kg boxes or 500 kg big boxes
- ✓ Available with work platforms or rollers/hydraulic lifts for unloading big boxes
- ✓ Watch Victor/Z at work here → **You Tube** 

NATALIA-V

- ✓ Full-row, tow-behind harvester
- ✓ Suitable for harvesting raspberry grown without supports
- ✓ Delicate for fruit and bushes
- ✓ Solution dedicated for large-acreage farms
- ✓ Equipped with sorting zone for even higher quality of the final produce
- ✓ Efficient cleaning unit with a fan
- ✓ Watch NATALIA-V at work here →

SAMSON

- ✓ One-row root shredder
- ✓ Used for shredding and slashing old roots of bushes: currants, chokeberry, gooseberry, raspberry, haskap and rosehip
- ✓ Even mixing of roots and dirt, efficient work
- ✓ Suitable for removing the bottom part of a bush when rejuvenating or removing plantations
- ✓ Watch SAMSON at work here → [YouTube](#)

SAVA

- ✓ Multi-functional machine for orchards and plantations
- ✓ Serves as a tool carrier, different tools available
- ✓ Helps maintain plantations clean and well-cared for
- ✓ Attaches to the front of the tractor
- ✓ Tools available:
 - sweeper
 - inter-row strimmer
 - inter-row tiller
 - herbicide sprayer
 - shoots cutter
- ✓ Watch SAVA at work here →

You Tube

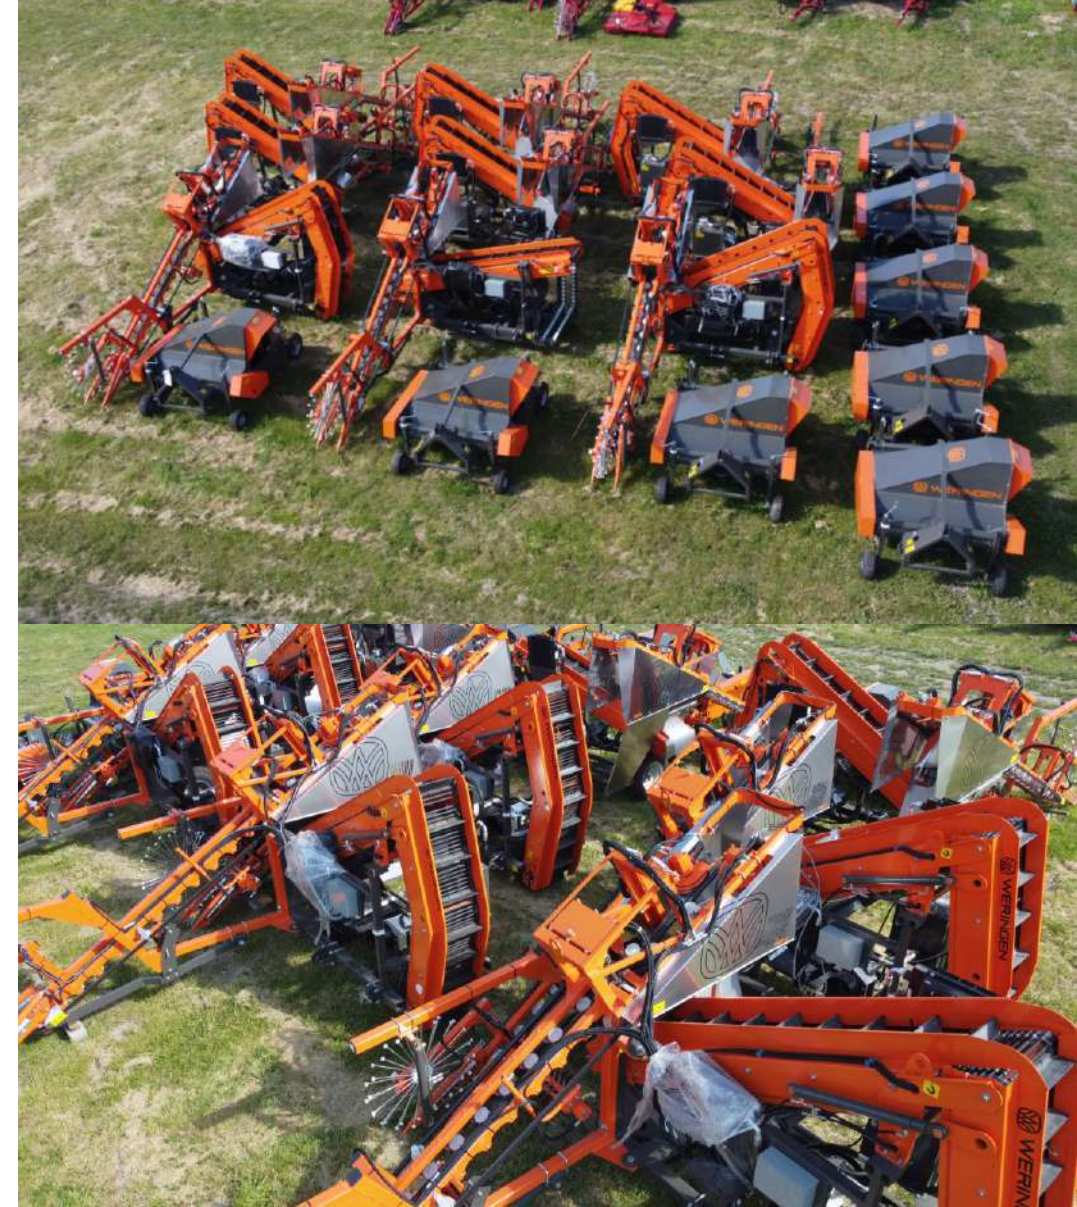

ROCH

- ✓ Currant shoots pruning machine
- ✓ Attached to the front of the tractor
- ✓ Hydraulic sweeper to remove shoots from under the bush
- ✓ Precise adjustment of cutting height
- ✓ Effective plantation rejuvenation
- ✓ Watch Roch at work here → **You Tube**

5. WERINGEN products line

- ➔ **WERINGEN RVS-1**
root vegetable harvester
- ➔ **WERINGEN RVE-1**
root vegetable harvester
- ➔ **WERINGEN RVM-2 Maximus**
Self-propeller root vegetable harvester
- ➔ **WERINGEN SCM**
ridges/beds forming machine
- ➔ **WERINGEN WPS**
pneumatic seeder
- ➔ **WERINGEN WPS – version for sowing on foil**
pneumatic seeder
- ➔ **WERINGEN RT**
root topper

WERINGEN RVS-1

- ✓ Tow-behind root vegetable harvester
- ✓ Harvesting 1 row at a time
- ✓ Suitable for carrot, parsley, parsnip, celery, beetroot and other root vegetables
- ✓ High efficiency due to wide, long-range conveyor with high shelves
- ✓ High harvesting accuracy, better quality of harvested vegetables
- ✓ Wide tires with „herringbone” or „hockey” pattern preventing from bogging down in mud
- ✓ Comfortable and user-friendly steering
- ✓ Strong and durable construction
- ✓ Modern design
- ✓ Watch WERINGEN RVS-1 at work here →

WERINGEN RVE-1

- ✓ Tow-behind root vegetable harvester
- ✓ Harvesting 1 row at a time
- ✓ Suitable for carrot, parsley, parsnip, celery, beetroot and other root vegetables
- ✓ Great choice for smaller farms or very demanding terrain
- ✓ 3 versions available: conveyor to the trailer, harvesting into box pallet, harvest into small boxes + working deck
- ✓ Available with electronically- or manually-controlled hydraulics
- ✓ Durable and lightweight construction
- ✓ User-friendly steering
- ✓ Watch WERINGEN RVE-1 at work here →

YouTube

WERINGEN SCM

- ✓ Tow-behind soil cultivation machine
- ✓ Available with ridge or bed forming roller
- ✓ Available as 2-, 3- and 4-row ridge former
- ✓ Available as 1- or 2-bed former
- ✓ Adaptation unit for second function (ridges/beds) available
- ✓ Special version for forming potato ridges available
- ✓ Strong and durable construction
- ✓ Easy steering
- ✓ Watch WERINGEN SCM2 at work here →

WERINGEN WPS

- ✓ Tow-behind pneumatic seeder
- ✓ Precise and accurate sowing
- ✓ Suitable for sowing all kinds of vegetables
- ✓ From 1 to 8 sections available on a single frame
- ✓ Movable seeding sections for different sowing configurations, quick adjustment
- ✓ Sowing on flat fields or on ridges/beds
- ✓ Easy adjustment to various seeds and spacing between vegetables
- ✓ Sowing in 1 or 2 lines
- ✓ Vacuum fan available as standard
- ✓ Watch WERINGEN WPS-4 at work here →

WERINGEN WPS

version for sowing on foil

- ✓ Tow-behind pneumatic seeder
- ✓ Precise and accurate sowing
- ✓ Version for sowing vegetables on foil (black mulch foil)
- ✓ Suitable for sowing cucumber, pumpkin, zucchini, cymling etc.
- ✓ Two available seed sowing spacing - 33 and 66 cm
- ✓ Quickly adjustable sowing depth
- ✓ Multi-section seeders available with movable sowing sections
- ✓ Watch the seeder at work here → [YouTube](#)

WERINGEN RT

- ✓ Tow-behind haulm shredder / root topper
- ✓ Removes haulm from the root and prepares vegetables to be dug out from the ground
- ✓ Adjustable height
- ✓ Available as 2- or 3-row haulm shredder / root topper
- ✓ Available as a haulm shredder without cutting discs or as a root topper without haulm shredder unit
- ✓ Watch WERINGEN RT at work here →
