

Seminar

"Machines, production lines and law."

Programme

10.00 AM

–

11.00 AM

Part 1. Machines, Contracts, and the Law: How Can Selling Manufacturing Technologies Be Safe and Profitable?

- I. Sale of machines and production lines. What kind of contract is it?
- II. Risk of disputes - does the size of the contract have an impact on this?
- III. Documenting the implementation of the contract - practical tips.
- IV. Breach of the contract – liquidated damages is not a cure-all.
- V. Financial instruments for industrial companies: leasing, loans and factoring in the purchase of machinery and equipment. - Bank PKO BP

12.00 AM

–

1.00 PM

Part 2. Sales of machines and production lines in an international context

- I. Contract with a foreign contractor - Convention on the International Sale of Goods - a law that is forgotten, but better to know before entering into a contract.
- II. A few words about the forum selection clause.
- III. Case studies - examples from our practice in matters concerning the sale, delivery and operation of machines and production lines.
- IV. Financing through leasing, especially in the scope of machines and equipment used in industry and agriculture. - PKO BP Bank

15.00 PM

–

16.00 PM

Part 3. Intellectual property protection and the role of artificial intelligence in machines and production lines.

- I. Contracts concerning machines and production lines and intellectual property rights – how to protect them? How not to violate them?
- II. Protection of intellectual property rights concerning machines and production lines in court.
- III. Artificial intelligence and machines and production lines – common points or points with many vectors?

After each part, we will be glad to answer your questions.
