

## UNIQUE HISTORY

1890

The company establishment

1950

Boom of industrial valves production

1975

Start of valve production for the nuclear power plants

2012

Start of valve production for renewable energy

2015

Extensive company reconstruction

2024

Member of RKL Holding

## MSA PRODUCTION PROGRAM

- Ball valves, gate valves, swing check valves, globe valves
- Special valves for nuclear power plants
- Cryogenic valves for temperatures as low as  $-196^{\circ}\text{C}$  and high-pressure environments
- Valves for metallurgical and other specialized industries
- Valves designed for renewable energy sources, including hydrogen technology solutions

## MSA'S UNIQUENESS

- 130+ years of tradition and experiences
- Production of valves with the largest diameters and pressure ratings (DN 3200/128", PN 400/Class 2500)
- New production hall equipped with cutting-edge technologies
- In-house cryogenic testing facility (tests down to  $-196^{\circ}\text{C}$ )
- State-of-the-art coating plant
- Complete in-house production, from design to delivery
- ISO 9001, 14001, API Spec Q1, and other certifications

## APPLICATIONS

Conventional and nuclear power, storage, transportation, and processing of oil and natural gas, water supply systems, district heating, and metallurgy.

# VISION FOR THE FUTURE

MSA is leading the way towards sustainable energy. It combines tradition with cutting-edge technologies, focusing especially on hydrogen and renewable energy sources.

Deliveries to  
**45**  
countries  
across 4  
continents

## RKL Holding

RKL Holding, the parent company of MSA, is a leader in logistics, storage, and foundry services.

It includes RKL Opava, specializing in top-tier logistics and storage, and RKL Foundry, with over 110 years of tradition in producing castings of grey and nodular iron. Together, they form a strong industrial group with Czech roots and a global reach.

## EXCEPTIONAL HISTORY, CZECH FUTURE

With over 130 years of history, MSA is once again a Czech company and a proud member of the strong RKL Holding Group. As a pioneer in valve manufacturing, MSA returns to the market with renewed energy and a clear vision: to combine its historical know-how with innovations for the future. In 2024, when MSA became part of RKL Holding, the company embarked on a new chapter of growth under Czech leadership, breathing new life into the firm and bringing dynamism and new opportunities.

We are here for you, ready to provide top-tier solutions and partnerships on the path to sustainable development.
