

# TMA ROBOTS FOR MEDICINE

TMA is a reliable partner in delivering advanced automation solutions designed for efficient, high-volume production of premium medical devices. Whether offering standard machines or tailored automation systems, we are committed to going above and beyond to support our customers' success.

## We specialize in these products

## Assembly of laboratory test tubes

## Liquid pipetting process

## Petri dish automation

# BENEFITS OF WORKING WITH TMA AUTOMATION

## Turnkey solutions

Thanks to our collaboration with ENGEL, we offer comprehensive turnkey solutions. What does that mean? When you order a production station from us, you receive an injection molding machine and automation tailored to your individual needs. The entire production cell can be delivered to you either from our headquarters in Gdynia or from Austria.

With this solution, you don't have to worry about integrating multiple suppliers into one production line. We are able to provide comprehensive support and technical assistance at every stage of the process. All of this is aimed at ensuring that your production is as efficient and profitable as possible.

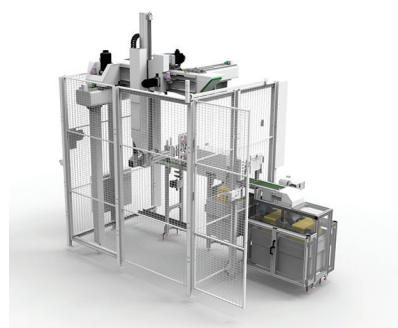

**ENGEL**

## Our competences

Assembly equipment

Process automation at the injection molding machine

Automation of receipt and insertion
