RE: ALLEN ORGAN AT THE VATICAN

The Allen Organ at the Vatican is a landmark installation for Allen Organ Company, taking into account both the gravity of the location and the choir in which it serves. The Allen Organ is used for major feasts inside and outside the Basilica, as well as accompanying the Sistine Chapel Choir, most recently for Christmas and Epiphany. Below is a link to the celebration of Holy Mass for the Epiphany celebrated by Pope Francis on January 6, 2019:
