

Optical Grade Liquid Silicone Parts

KinTat specialises in manufacturing high quality optical parts. Using state of the art machinery and mature processes we produce exceptionally transparent optical parts.

Drawing on our experience from numerous optical parts projects we produce e.g. automobile LED parts for you. We support our customers from idea to product and process development, all the way to industrial production.

Our high quality standard ensures each and every part is identical and meets your high standards as well as ours.

Molding

Combining this experience with our in-house mould design and toolmaking guarantee quick response times and timely delivery of all LSR injection moulding products, whatever your requirements are.

Surface finishes for molds

One of the key points for optical parts is the polishing of the mold. The VDI 3400 and SPI Finish are the two most widely used surface finishes for molds. They consist of 90% of finish references on the market.
