

Molding

We offer prototype, rapid and production mold tooling. All molds are fully designed in house to meet customer's specifications. The full modification, repair and maintenance facilities are equipped at the factory to ensure the molds can be quickly machined. Specialize in the following types:

- Compression mold
- Liquid Silicone Rubber(LSR) Injection mold
- Transfer mold
- Prototype mold

Combining this experience with our in-house mold workshop and rubber compounding facilities, we can provide you with a one stop shop solution, whatever your requirements are.
