together

We are a dynamic company with a multi-brand structure. We focus mainly on serving companies from the industrial sector by providing complete production cells, but we always strive for more. Therefore, we successfully operate in the HR industry and in the area of visual identification design. Each of our brands is independent, but when we work together, we achieve great things. Meet us! possibilities

PLASTIGO

A comprehensive range of products and services for plastics processors

In the Plastigo warehouse, you will find over a dozen injection molding machines in the most popular tonnages on the market, which we will perfectly match to your production needs. You will also find peripherals optimizing the process and solutions aimed at automating production and increasing its energy efficiency. What else? Apart from machines, equipment, and know-how, we will ensure safety. This is the most important thing we can provide you with. Service. Spare parts. Technological training. Plastics testing laboratory.

- ☐ nearly 1,400 delivered injection molding machines
- ☐ over 20,000 pieces of supplied peripheral equipment
- ☐ warehouse of spare parts worth over PLN 5 million
- ☐ peripheral outlet
- ☐ qualified sales and service
- ☐ purchasing platform

SHINI EUROPE

European distribution of peripheral equipment

At Shini Europe, we supply the entire continent with peripherals involved in the processing of plastics. We reach our final customers through a network of trusted European distributors, of which we have over 30. We have built these relationships over the years. What was our bargaining chip? Technical knowledge and experience. Verified devices that we select and model ourselves. Logistic potential in the form of our own reloading base, transport fleet, and qualified staff. Technicians. Traders. Good choices.

- ☐ service and sales in 5 languages
- ☐ over 6,000 of the most popular devices in stock
- ☐ over 18,000 spare parts in a warehouse
- ☐ own technical solutions
- ☐ technological training

OZZONE

Ventilation, air conditioning, refrigeration

Ozzone is a local ventilation wholesaler with a wide range of products and a specialist in large investments. Therefore, our main area of activity is servicing installers from all over Poland, for whom we produce assembly elements that ensure the proper functioning of ventilation systems. Our products are reliable, made of durable materials, and comply with applicable standards and hygienic certificates. You will find them in many office buildings, public buildings, or production halls.

- ☐ over 6 thousand different brands in stock
- ☐ sales throughout Poland
- ☐ own production of rectangular fittings and ventilation ducts

Energy-saving refrigeration solutions for industry

At Vikk, we design energy-saving cooling systems, deliver efficient refrigeration equipment with accessories, and promote the value of investing in energy and process heat recovery. By doing so, you can reduce cycle time, lower electricity consumption, and utilize unused energy to heat utility rooms in your production hall.

- ☐ standard chillers in the power range from 2 to 2,500 kW
- ☐ devices for special applications: in the process of laser cutting, extrusion, welding, CNC metalworking, film production by extrusion blow molding and for precision applications

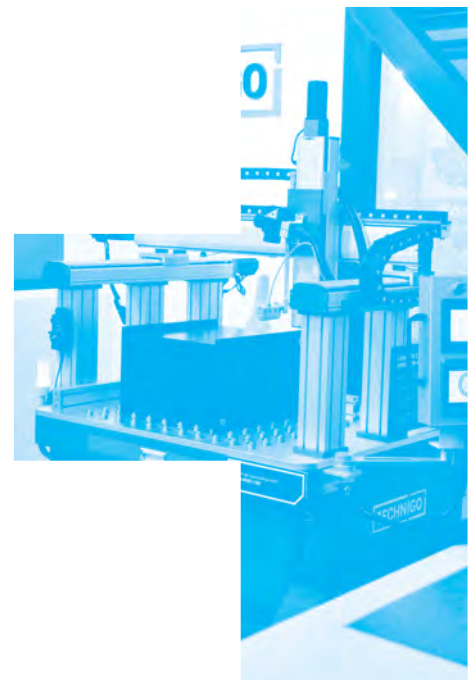

TECHNIGO

Laser technology and industrial equipment

The largest part of Technigo's offerings comprises laser devices, including markers and cleaning lasers. These highly energy-saving devices allow you to maintain a clean zone and, importantly, they do not degrade the serviced surfaces. It's worth noting that our lasers can be successfully used to clean injection molds without removing them from the machine.

- ☐ laser devices: cleaning lasers, laser markers, handheld laser welding machines and industrial cutting lasers
- ☐ security fencing
- ☐ assembly tables
- ☐ injection mold equipment
- ☐ plastic tanks
- ☐ detail tanks
- ☐ technical chemistry, tools, connectors and magnets

ADINO

Visual identity

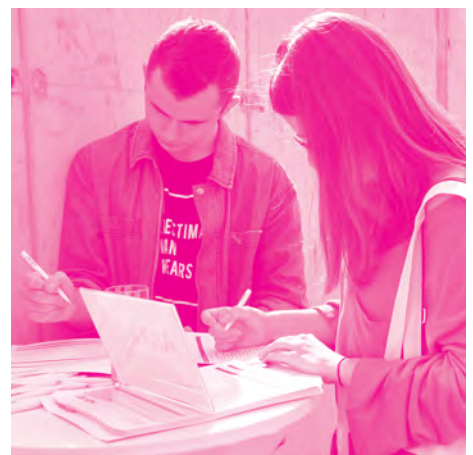

At our branding studio, our aim is to enhance the visual identity of businesses by designing logos that align with their essence and stand out in their representation. Therefore, don't abandon the strong image of your brand; instead, invest in shaping the perception of others. Let us handle the strategic and creative process as we specialize in creating compelling stories that can captivate audiences from afar.

HAVIER

HR solutions

Recognizing the challenges involved in the employee recruitment process, we have established our own employment agency that meets the most stringent requirements of employers. Our specialists go beyond recruitment and provide comprehensive HR solutions tailored to your needs.
