

CLARK MASTS™

QT-M Series

The lightweight mast with 101 uses

These telescopic masts are in use world-wide in their thousands. They are in continuous production since 1959 by Clark Masts.

The popularity of QT masts lies in the concept. Aluminium construction for lightness and air pressure operated for simplicity. The attached handpump provides the air for extension and the air release screw exhausts for retraction. For permanent extension, each section must be locked extended. In windy conditions, the mast has to be guyed using the guy collar.

CLARK MASTS - Pioneer in fast erecting mast systems

Technical Details

Silent, smooth and easy operation

The features that have made it such an attractive and useful piece of equipment are :
