

Hawkeye Air Defence (AD)

An Essential Piece of the Puzzle

Integrated sensor suite optimised for acquisition, tracking and engagement of air targets.

Key Features:

- Dynamic direct-drive positioner
- High-definition sensors (thermal imager and DLTV)
- High-performance laser range finder
- Built-in tracker
- Digital architecture
- Combat system agnostic

Our Hawkeye AD system provides an integrated fire control solution for all types of ballistic effectors. It contains high-definition thermal imager and daylight TV sensors, coupled with a high performance laser range finder, all co-mounted on a dynamic direct-drive positioner. With a built-in tracker, Hawkeye AD delivers precise 3-D coordinates of both air and surface targets to gun control or combat systems. It is suitable for use on both fixed and mobile platforms.

Multiple target tracking capabilities.
