

SECURING YOUR FUTURE

As a pioneer in innovative bolting solutions with decades of experience solving engineering challenges all over the world, Nord-Lock Group can provide the solution you're looking for.

All solutions are developed and manufactured in-house, ensuring they meet the highest standards in the industry.

Our team of dedicated experts work closely with customers all over the world.

MECHANICAL INTEGRITY

The need for regular maintenance must be minimized. Any downtime should be limited to reduce operational expenses and increase production rate.

RELIABILITY

We make sure your bolted connections survive the long-term effects of the prevailing conditions. Either vibration, flexing, shock loading, fatigue or corrosion.

SAFETY

Minimize the safety risks involved in the assembly, operation and maintenance of any bolted connection, thereby improving operators safety.

TESTED AND CERTIFIED

Our washers have been rigorously tested and approved by independent institutes and authorities, ensuring that they meet the most stringent standards and safety requirements.

FULL TRACEABILITY

From the laser mark, trace your washers' origins to raw materials and production controls for that batch.

NCAGE AND NSN NUMBERS

To support procurement and streamline logistics, we provide easy access to our NSN and NCAGE codes. Use QR code inside for more info.

RELIABLE & SMART SOLUTIONS FOR YOUR APPLICATION

Nord-Lock wedge-locking technology secures bolted connections – even under extreme conditions

Multi-jackbolt tensioners break down high preload requirements into lighter torque values.

Hydraulic tensioning technology ensure accurate and even preload, custom made to your specifications.

Optimized pin systems to shorten downtime, simplify installation and maintenance and reduce wear.

WHEN SAFETY REALLY MATTERS

BOLTING SOLUTIONS FOR DEFENSE AND SECURITY

WE HAVE THE SOLUTION FOR YOUR APPLICATION PROBLEMS, SUCH AS:

- Fastener failure
- Bolt loosening
- Broken bolt
- Shock loading
- Extreme vibration
- Dynamic loads

APPLICATIONS

THE WORLD'S TOUGHEST WORKING ENVIRONMENTS

Our bolting solutions are used all over the world, from sea level to stratosphere. Our products are engineered to excel in the harshest environments, giving you peace of mind while you focus on the task at hand.

PRODUCT SELECTION

Nord-Lock Group offers products in a wide range of materials to suitable for general steel and stainless steel applications, as well as corrosive, acidic and high temperatures environments. Our products are also available in a varied selection of sizes, materials, coatings, and colors, developed to meet the demands of even the toughest environments.

JOINT DESIGN

Our technical engineers can provide complete joint calculation, vibration testing and validation. We offer support in dimension selection, fatigue considerations, friction testing and finite element analysis, ensuring correct preload and tension.

AN APPROVED SOLUTION

The Nord-Lock washer is a premium product with documented success in many industries. Our products are approved by several industry standards and specified by numerous international companies.
