

# Swedish Defense Delegation

MSP0, Kielce

September 2-5, 2025

# About the Swedish Pavilion

## Dear Friends,

The Swedish pavilion is organised by Business Sweden and the Embassy of Sweden in Poland as part of a joint effort to showcase Sweden's innovative defense and security sector at MSPO 2025 in Kielce.

We are pleased to host representatives of Swedish companies and regions, along with experts and officials from government agencies and institutions.

We are especially honoured to welcome representatives from the Swedish Ministry of Defence, FMV, and key stakeholders from the defense industry and public sector.

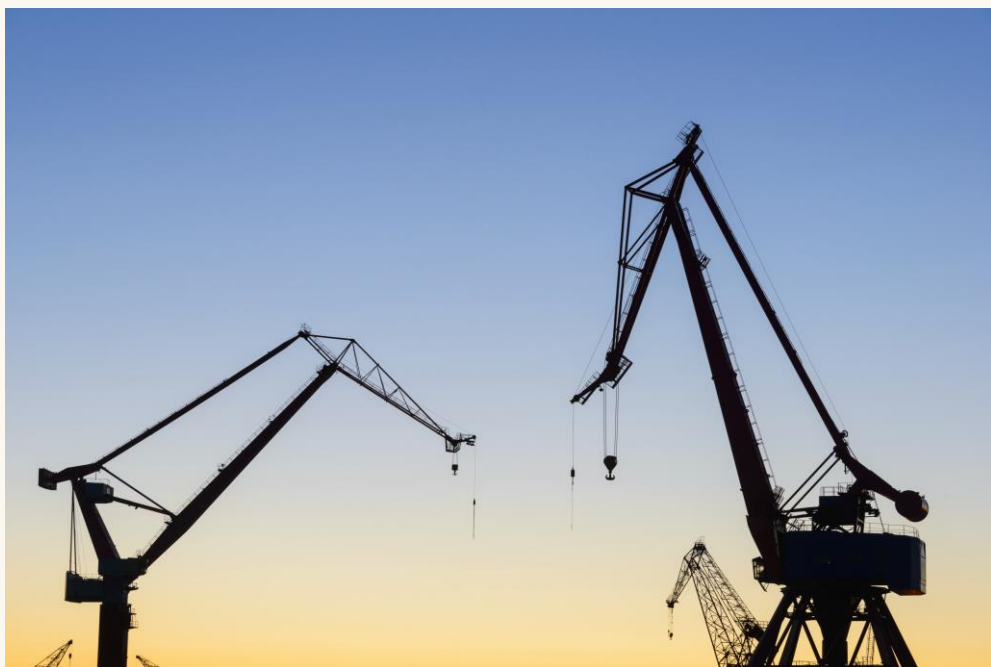

This year's presence takes place in the context of strengthened bilateral cooperation between Sweden and Poland in the area of defense and security, following the joint declaration signed by Prime Ministers Ulf Kristersson and Donald Tusk. This agreement reinforces our mutual dedication to regional stability, joint capabilities development, and industrial collaboration.

The Swedish pavilion is a testament to this and showcases a wide array of innovative companies and organisations. We invite you to explore their solutions in such areas as advanced defense systems, cybersecurity, secure communications, land systems, aerospace technologies, and dual-use innovations, as well as manufacturing and export capabilities.

At MSPO 2025, we look forward to engaging in meaningful dialogue, expanding bilateral cooperation, exchanging expertise, and forging new partnerships – all aimed at strengthening Europe's innovation, security, and resilience.

Scandinavian Astor Group is a defence group delivering high-performance products, systems, and services – from concept to final solution. Through our specialised subsidiaries, we address the full spectrum of defence and civil security needs, offering both complete systems and niche capabilities tailored to critical missions.

Operating through three business areas – Astor Tech, Astor Protect, and Astor Industry – we combine advanced technology, protective solutions, and high-precision manufacturing. Together, our companies ensure security of supply, operational readiness, and long-term support for European and other international customers.

Rooted in Sweden and expanding globally, we offer innovation, reliability, and proven industry expertise. With a strong acquisition-driven growth strategy, Astor Group is shaping the future of defence – one solution at a time

Together, we are empowering society with strength and security – in all elements.

Ericsson has more than 170 live 5G networks operating in more than 60 countries today, providing a full end-to-end 5G platform that can be built upon and expanded as new technologies and use cases evolve. This has been proven by positioning Ericsson as a Leader in a Gartner Magic Quadrant™ for 5G and ranking the leader in the Frost Radar™ 5G Network Infrastructure Market 2024 analysis in both for the four consecutive years.

In addition to being the market leaders for 5G we are the market leaders for Mission Critical Networks across Public Safety, Utilities, Rail and Defense.

Ericsson is the undisputed technology leader and network expert in 5G, bringing together the technological superiority, proven solutions, and world-class partnerships with leading large communications service providers (CSPs) and systems integrators globally to enable defense organizations to accomplish current missions and accelerate their digital modernization journey through 5G and future technologies.

Habia specialises in customised connectivity solutions for the most challenging applications and unites two innovative connectivity companies: HEW-KABEL and Habia Cable with production facilities in Sweden, Germany, Poland and China.

Whether in the air, sea or on land – all cables and harnesses must deliver optimal performance – regardless of physical, thermal, pressure, and chemical impact. This means that cables and harnesses must perform to their maximum ability. That's why we combine the right materials to ensure high flexibility and exceptional current carrying capabilities – without compromising on durability.

Habia is an active partner to the defence sector, providing a wide variety of military-grade cable and harness solutions for radars, weapon stations, vehicles, ships, sonars, drones, satellites, and much more. In close collaboration with leading military partners and suppliers, we have a strong track record of meeting the needs of the most demanding applications. Together with our customer we solve connectivity challenges and enable the technologies of the future.

Business Development Manager

[pawel.reszel@novatorsolutions.se](mailto:pawel.reszel@novatorsolutions.se)

Novator Solutions delivers cutting-edge electronic warfare (EW) and signals intelligence (SIGINT) systems, equipping national defence and intelligence agencies with state-of-the-art multichannel receivers and wideband recording solutions. Leveraging software defined radios (SDRs) and RF instrumentation, our core offerings include multichannel receivers and wideband RF/IF recorders, designed to meet the demanding operational requirements.

Our channelizer technology transforms wideband signals into multiple narrowband channels, replacing thousands of traditional receivers with a single high-performance system. Options include mobile RF monitoring and direction-finding units, as well as interoperable receivers for long-term COMINT, with over 6,000 digital drop receivers integrated into SIGINT networks.

Our wideband recorders capture high-rate signals continuously with gapless RAID storage. Operators can monitor in real time or replay and analyze complex signals using software, with features like precise timestamps and pre-trigger buffering enhancing capability.

Sordin is a Swedish manufacturer of advanced hearing protection systems designed for military and tactical use. Our core offering includes the new Sordin Supreme T2 and T2CC, premium headsets that combine clear communication, rugged durability, and certified protection built on the brand-new modular platform SordinFLEX which allows for interchangeable suspension kits and attachable or completely fixed boom microphones.

Built for high-noise, high-stakes environments, the T2 platform features level-dependent ambient sound, impact noise suppression, and compatibility with modern helmets and push-to-talk systems. The T2CC adds advanced comms integration for seamless use with radios and dual-channel setups.

Designed and manufactured in Sweden, all Sordin headsets meet strict MIL and EN standards. We focus on mission-critical performance—whether in active operations, training, or border protection. Trusted by NATO units and special forces, Sordin delivers proven audio clarity and protection in every scenario.

WiTTRA Networks AB is a Stockholm-based innovator in wireless IoT solutions, providing a robust technology platform for secure, long-range, radio-based positioning and monitoring of assets.

Our mission is to answer the critical question: "Where is my stuff, and what is it doing?" WiTTRA's innovative Hybrid Real-Time Location System (RTLS) addresses the global challenge of reducing digital transformation costs in industry. By combining Ultra-Wideband (UWB) precision with 6LoWPAN mesh efficiency and low cost, WiTTRA offers a unified, future-proof solution for positioning and monitoring assets that delivers unparalleled accuracy and cost-effectiveness, indoor and outdoor, even in extreme environments.

At MSPO 2025, we are excited to showcase how WiTTRA's technology supports modern industrial, defence, security, and logistics challenges—offering flexible, secure, and scalable tracking and monitoring of assets. Join us to discover how WiTTRA is redefining IoT connectivity and location intelligence for the digital age.
