

## Your European Partner

**ST Engineering Antycip is the singular point of contact for all your MAK ONE needs throughout Europe, but our relationship with MAK Technologies extends beyond that.**

Being subsidiaries of ST Engineering, our positions as sister companies allows for a closer relationship and deeper knowledge, enabling us to combine our efforts and reap the rewards of our rich collective experience and expertise.

We also offer a range of services in support of MAK Technologies, including bespoke plug in development, training and helpdesk functions, systems architecture expertise and advice, workshops, and terrain / 3d model development to support our continuous joint efforts in simulation.

Our "local" knowledge and expertise in the European region as well as our security clearance are just some of the reasons why we have exclusive distribution in Europe. This also allows us to act as a bridge between key allies and as a channel for disparate experts and stakeholders to get on the same page.

With the addition of our strong ecosystem of partners, ST Engineering Antycip is primed to deliver the best global solutions for all of our customers and uphold the cutting-edge of simulation technology for training, modelling and analysis of tomorrow.

## Cutting-Edge Simulation Solutions

### Who we are

Since 1997, ST Engineering Antycip has supported customers across the globe in defence, academia, commerce and industry to become better at what they do and break down barriers to their operations. As an expert provider of simulation, analysis, modelling, display and virtual reality solutions, we combine our in-house technical expertise with an unrivalled range of products and passion. Using our expertise in the field of professional, COTS simulation solutions, and the latest technologies, we will work in a close, supportive integrated partnership with you to find the right solution for your organisation.

 **ST Engineering**

**ANTYCIIP**

**See the future**

## MAK ONE - The software platform for modelling and simulating whole-world multi-domain synthetic environments.

MAK ONE is a complete suite of modelling and simulation applications with infrastructure tools to create multi-domain synthetic environments in realistic geographic and environment representations with accurate behaviours and correct model fidelity. MAK ONE is fully customizable with configuration tools and application programming interfaces (APIs) available at all levels of the technology stack!

- **MAK ONE Applications:** VR-Forces, VR-Engage, VR-Vantage, SensorFX
- **MAK ONE Infrastructure Tools:** VR-Link, VR-Exchange, MAK RTI, MAK Data Logger

## Visual Displays

## Simulation-based training, modelling and analysis can be enhanced further thanks to our range of tailored immersive display solutions.

To help raise users' levels of immersion and realism, we will find the right fit for you in our range of visual display solutions. Whatever your application, need or environment.

At ST Engineering Antycip, our visual display solutions are specifically designed and optimised to meet your unique requirements for any project no matter how demanding.
