

SafetyReel G2 hose and cable reels

For extended reach and maximum performance

Extended reach. Maximum performance.

The CEJN SafetyReel G2 hose and cable reels build on the trusted reputation of the SafetyReel family, delivering the same premium quality and smart features as our small-and medium-sized models – now with even more reach and higher flow or power.

Hose reels

With hoses up to 30 meters, it delivers increased capacity and features a versatile, multi-purpose hose for both air and fluids.

Cable reels

The cable reel is built for demanding environments requiring long reach and high power. It has a 25-meter cable length and is available in two versions: 1-phase and 3-phase (400V).

Longer reach and maximum performance

Available with hose lengths up to 30 m and cable lengths up to 25 m, the SafetyReel G2 delivers high flow and reliable power for applications that demand extended reach.

Same hose for both air and fluids

You no longer have to choose between a hose for air or fluids – this versatile hose is designed for both. Enjoy the convenience and efficiency of a single solution.

3-phase and overload protection

The cable reel has a built-in safety fuse that cuts power if it overheats, preventing short circuits and ensuring safe use. A 3-phase (400V) version is also available for maximum performance.

Viscosity brake function

The SafetyReel G2 features our innovative, pending-patent Viscosity Brake. This braking system is designed with precision and delivers consistent, reliable performance while providing an unmatched operational lifespan.

Improved latch function

The new auto-stop function, with its short built-in locking points, allows the hose or cable to lock instantly whenever you stop pulling, placing it exactly at the distance you need. With a simple pull, it rolls up again.

Easy latch deactivation

Don't want the hose or cable to lock? The new SafetyReel makes the latch deactivation very easy. You simply remove the side cover and lift the latch to a non-active position, and you can just as easily activate the latch again.

+ all the other SafetyReel features

The SafetyReel G2 hose and cable reel has the same great benefits as its predecessor, such as slow retraction, precise hose guiding, a tripping-prevention stop ball, and easy installation and (hose reel) maintenance.

Great on their own. Perfect together.

While each reel is a reliable solution on its own, together, they form an ideal duo of convenience and versatility across a wide range of applications:

- Commercial vehicle manufacturers • Tyre changing centers • Construction sites
- Heavy vehicle workshop • Large grinding applications • Industrial cleaning
- Commercial vehicle wash • Wash down

Hose reels assortment

Part nr.	Category title	Hose length (m)	Hose color	ID x OD (mm)	Connection inlet

A SafetyReel for every need

We are very proud of our wide assortment of hose and cable reels. Every reel is unique, but they have the same great features in common. In this range, you will surely find a reel suited for multiple different media: compressed air, fluids, breathing air, electricity and (soon) even reels approved for the food and beverage industry.

A growing product range

We are continually expanding our product offerings with innovative solutions tailored to enhance your operations. Visit www.cejn.com for the latest updates.

The ideal match

Combine your SafetyReel with high-performance CEJN air and fluid guns for an ideal setup. Featuring safety nozzles and tubing that comply with OSHA and SUVA standards, these air and fluid guns deliver powerful blowing performance with minimal noise, all in an ergonomic design for comfortable handling.

Made in Sweden since 1955

We have been producing professional, high-quality and innovative quick connect couplings here at CEJN since our first patented coupling was launched in 1955. CEJN is an independent global niche company with its head office in the heart of Sweden. Over the years we have expanded to 22 locations worldwide and are supplying products and services to virtually every industry segment. At CEJN, we are united by our five core values: safety, environment, quality, innovation and performance. They are our cornerstones and define who we are, how we work, what we believe in and what we stand for.
