About 4 ECO: Founded in 2018, 4 ECO is a dynamic solar energy company based in Poland. It has made a name for itself by offering innovative and sustainable renewable energy solutions and has quickly become a significant player in the solar energy industry. Our mission is to accelerate the adoption of solar power and contribute to the world's transition to a greener, more sustainable energy landscape. We also strongly support the idea of CSR and we are involved in various actions for the benefit of the local community, supporting sports clubs as well as social and charity initiatives.

Product Offerings:

PV Modules: 4 ECO offers efficient PV modules for residential, commercial, and industrial applications.

Solar Inverters: 4 ECO's solar inverters ensure seamless energy conversion.

Heat Pumps: 4 ECO has developed its own brand known as HEATECO. The product combines the latest technology with an exceptional design to provide efficient heating and cooling for homes and businesses.

PS Coat Thermal Insulation: 4 ECO introduces this cutting-edge solution which is based on microspheres. They create a highly effective insulating barrier, keeping interiors cool in summer and warm in winter, while also being lightweight and easy to apply.

Solar Plants: 4 ECO specializes in designing and building solar plants for commercial and industrial clients. Their turnkey solutions encompass everything from project planning and system design to equipment procurement, installation, and commissioning.

4 ECO's dedication to customer satisfaction, along with the company's qualified sales & installation teams, has helped us build strong relationships with our clients. We offer them personalized support, tailored system design, and reliable after-sales services and thus they derive maximum benefits from their solar, heat pump, and thermal insulation investments.
