## PRODUCTION OF MACHINES FOR SURFACE PREPARATION AND COATING

### KEY FACTS

Company GTV Blast  
Established 1991  
Website [www.gtvblast.lt](http://www.gtvblast.lt)  
Turnover

### ABOUT THE COMPANY

GTV Blast is machine-building company with more than 30 years of experience in the industry. Company offers standard production line, as well as tailored made solutions. Company is one of the leading producers of machines for surface preparation and coating in the Baltics. GTV Blast ensures good conditions for product distributors providing with spare parts, training and technical support.

30+ Years Experience

Standard & Custom Solutions

Price Quote Available

In-House Production

Open to Exclusivity

Fast Lead Time

### THE COMPANY'S PRODUCTS INCLUDE (BOTH MANUAL AND AUTOMOTIVE EQUIPMENT):

SHOT-BLASTING MACHINES AND LINES

SHOT-BLASTING CHAMBERS

EQUIPMENT FOR SHOT-BLASTING CHAMBERS

COATING-DRYING CHAMBERS

SHOT-BLASTING CABINS

FILTRATION DEVICES

## SHOT BLAST MACHINES AND LINES

- Designed for **automatic processing of the surface** of castings, profiles, sheets, structures and other products using abrasive stream.
- The **abrasive stream** generated by the turbines cleans and roughens the processed surface.
- The **collection and recovery system** of the abrasives ensures circulation within a close cycle and efficient **separation of dust**.
- Dust is sucked into filter therefore working **perfectly clean**.

**TYPES:** Roller conveyor shot blast machines | Tunnel type shot blast machines | Hook type shot blast machines | Belt conveyor shot blast machines | Shot blast machines for pipes | Rotary table shot blast machines | Shot blast machines for drums and gas bottles | Shot blast machines for wire and bars | Special shot blast machines

## SHOT BLAST ROOMS & EQUIPMENT

- Various dimensions
- The modular structures are **fully equipped**
- **Automatic collection** and recovery system of the abrasives
- It can be mounted without recess

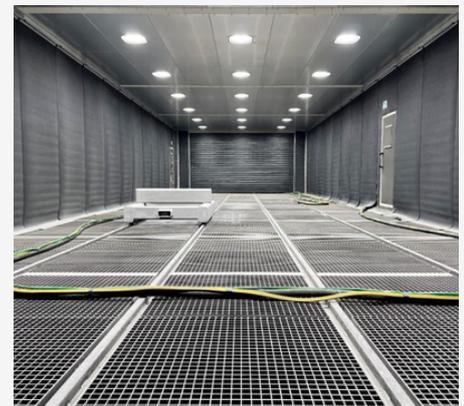

*Collection and recovery systems of the abrasives | Ventilation and filtration systems | Automatic platforms for the operator | Lamps | Ventilation channels, cofferdams and shutters | Gates and doors | Rubber for the walls*

## SPRAY PAINTING LINES & EQUIPMENT

- Tailored engineering according to client's requirements
- For **wet and powder painting**
- For the details of different dimensions
- Various **transportation ways** of the details
- Modernization of the painting lines
- Satisfies **EU norms and requirements**
- CE confirmation declaration, **certificate ISO 9001**

**TSPRAY PAINTING EQUIPMENT:** Airless spraying | 2K equipment | Feed pumps | Injection machines | Sprayers | Operator safety measures

## SPRAYING & DRYING BOOTHS

- Designed for **industrial application**, spraying and drying
- Various dimensions
- The modular structures are **fully equipped**
- Numerous combining and assembly options
- Heating using various energy sources
- In conformance with the **EU standards and requirements**
- Automatic platforms for the operator
- **Safe systems**
