

inSight

IIoT PLATFORM

Transform Production Data into Actionable Insights

Real-time visibility, smarter decisions, optimized operations — all on one platform.

inSight IIoT Platform is a cloud industrial data reporting and monitoring solution that unifies production data from machinery and processes into one intuitive visual dashboard, enabling comprehensive operational insight anytime, anywhere.

inSight features:

| | | |
|---|---|--|
|  Complex management of technological processes |  Visualization of important processes |  Improving the quality and productivity of production processes |
|  Industrial data management |  Modern graphical and intuitive design |  Secure access from any device |

Key Benefits

- Real-time production visibility. See productivity, energy use, and alerts in real time.
- Always accessible. Available on phones, tablets, or computers.
- Improved decision-making. Historical data and trends at your fingertips.
- Greater operational efficiency. Centralizes reporting to reduce manual work.
- Scalable to business growth. Choose the level that fits your company and upgrade easily.

How it Helps Users

- Boost productivity with instant insights into production performance.
- Reduce costs by identifying inefficiencies and energy spikes.
- Eliminate guesswork with accurate, historical, and real-time data.
- Streamline operations by linking production data with enterprise systems for smarter planning.

Use Cases / Who It's For

- Manufacturing Managers seeking instant visibility into production lines.
- Operations Teams tasked with efficiency and performance reporting.
- Industry 4.0 Adopters integrating data into their digital workflows.
- Any production environment, from legacy lines to high-tech automated plants.

Credibility / Proof Points

- Designed and delivered by a proven industrial technology provider.
- Already used in production by established manufacturers including Hitachi and ISAN.
- Scalable, modular platform that grows with your business.
- Proven in real manufacturing environments across dozens of companies.
