

Fields of application

Pipe extrusion lines

PO and PVC pipes

Complete extrusion lines for single- and multi-layer, rigid or flexible PVC and polyolefin pipes, with diameters up to 1,600 mm.

Pelletizing extrusion lines

Pellets and compounds

Customisable extrusion lines producing granules from virgin or recycled materials for moulding, extrusion and calendering.

Profile extrusion lines

Technical and window profiles

High-performance MD and E-GO extruders for reliable production of rigid and flexible profiles of any size.

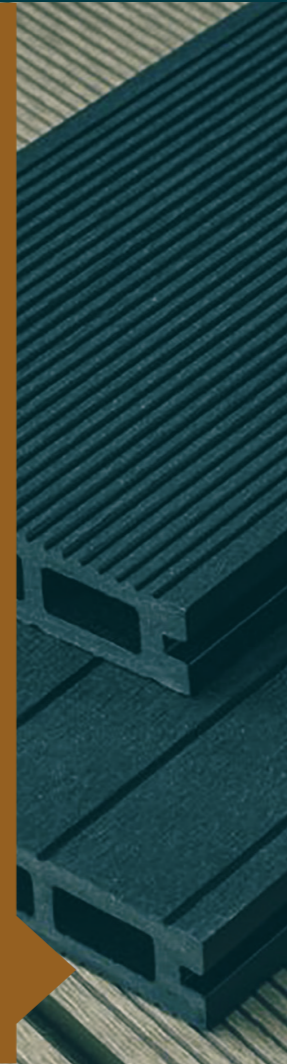

Recycling extrusion lines

Recycling and regranulation

Single- and twin-screw extruders for efficient reprocessing of a wide range of plastic materials.

WPC extrusion lines

WPC deck and floor

Polywood technology for sustainable, recyclable WPC profiles with high natural fibre content.

Medical extrusion lines

Medical products

Custom extrusion systems for PVC and pharmacopoeia-approved materials, meeting the highest medical standards.
