

Designers of technology. Creators of value.

Our expertise goes far beyond the extrusion process. We design and develop **completely customized solutions**, which embrace every aspect of our customers' projects.

This means not only supplying a machine, but offering an **all-round technological package**, capable of responding to specific needs and anticipating future market challenges.

Hi-TECH.
Hi-HUMAN.

Designed with
expertise

Made with
passion

Built with
care

Our technology is the direct result of the **skills**, **passion** and **care** that we put into our work every day. For over 45 years, we have been committed to providing customized extruders, downstreams and toolings for plastic extrusion, and our strength lies precisely in building **valuable human relationships**.

Our exclusive technologies. Shaped around your projects

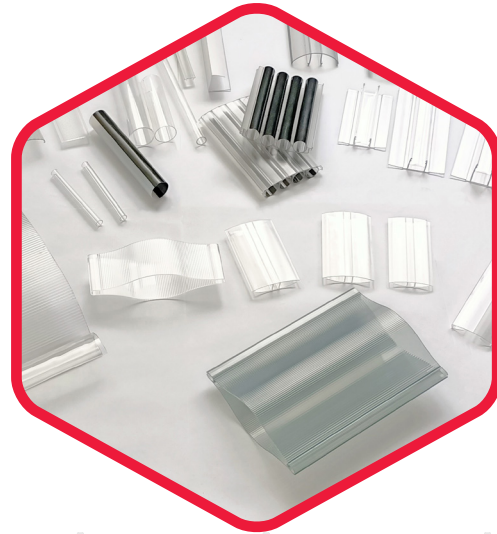

FRIULFILIERE
COMPLETE EXTRUSION PLANTS

Customisation is not just a possibility, but the foundation of our creative process.

With a history that speaks of decades of success and overcoming the most complex challenges, Friul Filiere is the trusted choice for those seeking not just a supplier, but a **true strategic partner**.

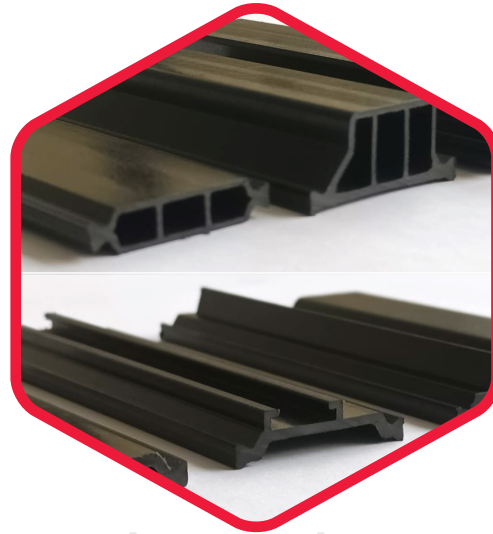

Choosing Friul Filiere means relying on a **legacy of excellence**, where every customer is at the center of solutions truly designed and implemented around their needs.

Our **exclusive technologies** prove it: we design machines and equipment capable of extruding **high-quality profiles** to transform our clients' projects into real value.

PC PROFILES

Smooth, embossed or co-extruded profiles for the lighting, construction and co-extruded profiles and tubes.

THERMAL BREAK

Compact and foamed PA profiles
(Light Thermal Break)

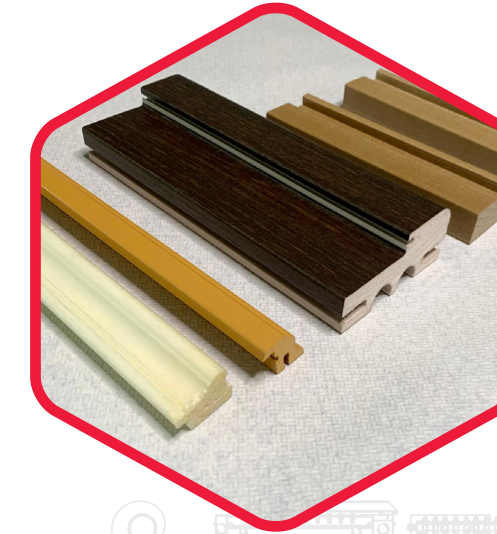

TPU

TPU profiles and tubes for belt and strap guides, sliding profiles, solid rods, pipe coatings.

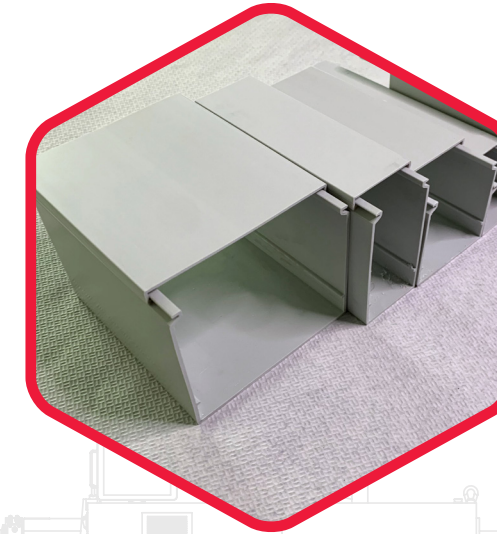

TPE AND TPV GASKETS

Multiple applications in the building and furniture industry, the food and medical industry, and the automotive industry.

FOAMED PROFILES

PVC, PS, PA, PP and Biocomposite profiles for the building and furniture industries.

HALOGEN FREE

Cable ducts for electrical installations and switchboards in PC + ABS.
