

HONG WEI MACHINERY INDUSTRY CO.,LTD.

Address: 1F.,NO.29-5, LN.37,JIANYE ST., WEST CENTRAL DIST., TAINAN CITY 700, TAIWAN (R.O.C.)

TEL: +886-6-2432665 FAX: +886-6-2438933

E-mail: a0919629292@yahoo.com.tw

Website: www.hongweimachinery.com

Characteristics

European technology ensures stability and reliability

Extrusion control precision up to $\pm 0,3\%$

Accurate proportioning with $\pm 0,5\%$ precision

Reverse mixing for uniform blending

Modular design for cost-effectiveness and efficiency

Energy-saving and environmentally friendly, reducing raw material consumption

Gain-In-Weight Batch Blender

(Model : H-BATCH-6-300)

Feature : H-Batch Blender is applied in the field of extrusion. It is based on the industry 4.0 technology. It manages extrusion material control, extrusion process, and assists the technology department to manage the extrusion formula effectively. Using professional high-speed valve and reverse spiral stirring technology and continuous weightlessness control technology, precise proportioning of raw materials and mixing can effectively avoid chromatic aberration and reduce labor. The unique continuous weightlessness control technology, fast and accurate control of the extrusion output, combined with thickness / gramme effectively save 2% raw materials.

The Gravmetric batch blender series can freely combine 2, 3, 4, 5, 6,7,8 kinds of raw materials according to needs, The output is highly up to 800KGS/HR.
