Our All In One Approach

At Rebound Electronics, we offer end-to-end solutions designed to streamline every aspect of your supply chain.

From global sourcing and data-driven BOM analytics to proactive shortage management and obsolescence strategies, our services ensure you have seamless access to high-quality components.

Expertise Built for the Computing Industry

Our team understands the complexities behind computing supply chains, from component sourcing and lead-time pressure to cost volatility and regulatory compliance. We work as an extension of your business, providing agile, scalable solutions that adapt as your needs evolve.

WE HELP ENSURE CONTINUITY,
VISIBILITY, AND CONTROL ACROSS
YOUR SUPPLY CHAIN

Whether you're managing high-volume production or specialised computing components, we help ensure continuity, visibility, and control across your supply chain.

Product Groups

- GPUs
- Switches
- CPU (Processor)
- Storage (SSD, HDD)
- Memory Modules (DDR, RAM)
- Finished Goods (Graphic Cards, Power)

Our global purchasing power allows us to support almost any product requirement.

Our Reputation & Standards

From our founding in 2003 we always have been and always will be passionate about service.

We believe that all our clients, regardless of size or location, deserve the best levels of focus with the opportunity to access true global market pricing and availability.

Data driven decision making ensures that Rebound can offer clients effective connected supply chain and inventory management solutions.
