ABOUT US

GEVORKYAN Force Defence was established as a subsidiary of GEVORKYAN, a.s. with the purpose of concentrating long-standing know-how and manufacturing capabilities on the defence industry. It builds on years of experience in the development and production of components for the civil arms sector and translates this expertise into a new era of modernised defence.

The company is a reliable european manufacturer of next-generation specialised components for armed forces, law enforcement units, and NATO partners. We focus on innovative, precision-engineered, and highly durable parts that meet strict requirements for safety and quality.

G-FD is founded on strong technological excellence from in-house development to serial production in high volumes. A key competitive advantage lies in our ability to develop and manufacture our own raw materials, allowing full process control and ensuring maximum stability of material properties even in the most demanding applications.
