Light Armored Vehicle

Strength, protection & versatility

Integrated C-UAS system

Integrated fully automated drone detection and neutralization system featuring **passive RF detection**, **active jamming** and **GNSS spoofing**. Provides **Protection On the Move** against COTS, DIY and FPV drones. Operated from inside the vehicle via a ruggedized tablet.

Superior off-road mobility

Engineered to perform in mountains, deserts, rough terrain and off-road environments, delivering exceptional maneuverability and mission flexibility.

Multi-mission platform

Modular configuration accommodates **5 or 8 personnel** and can be rapidly adapted for patrol, tactical, rescue, medical or special operations.

Enhanced crew protection

Armored structure protects against **IEDs**, Molotov cocktails and projectile attacks, ensuring maximum crew safety in high-risk environments.

Modular Kitted Hull system

Removable external armor panels enable rapid installation whenever increased protection is required, allowing the vehicle to adapt to changing operational demands.
