

Stabilization - Gimbal/Turret

Interconnect, Thermal Management

Miniature Circular, Micro-D, Nano-D & High-Speed Interconnects

Hyperboloid Power, Signal & PCB Connectors

Expanded-Beam Fiber-Optic Interconnects

Low-Loss & Phase-Stable Coax Cable Assemblies

Filtered Connectors & EMI Filter Modules

Heat Sinks, Heat Pipes & Card Retainers

EMI Shielding, Gaskets & Thermal Interfaces

Processing, Networking & Control I/O

Rugged Vision & Control Computers

Rugged Embedded & NVIDIA Based Computing

Computer-on-Modules & SBCs

Deterministic Ethernet & Precision Timing

Rugged Computing & Serial, Ethernet & Digital I/O

Motion Control & Rotary Transmission

Servo Drives

Direct-Drive Torque Motors & Servo Motors & Resolvers

BLDC Motors & Linear Actuators

Motors, Pan-Tilt Positioners & Resolvers

Slip Rings & Rotary Data Transfer

Power Management & Filtering

Power Conversion, EMI Filtering & UPS, VPX

Solid State Power Controller, Surge Protection (TVS) & Motor Control

Solid State PDU & Battery Charging

EMC/EMI Power-Line Filtering

Stabilization, Geo-Pointing & Navigation

Tactical-Grade MEMS IMUs + High-Stability MEMS Accelerometers

Motion Tracking & GNSS/INS

Resilient GNSS Positioning & Heading

SynQor

Rugged, high-reliability power systems for demanding applications: DC/DC and AC/DC converters, EMI filters, PFC modules, UPS, and VITA VPX power solutions.

Sensitron

Solid state power controllers (SSPC), TVS and motor controllers, MIL-qualified and space-level diodes, rectifiers, and transistors.

MPE

High performance EMI/RFI power line filters, including TEMPEST and military vehicle solutions, engineered for demanding defence and industrial environments.

Verte Electronics

Rugged military smart solid-state power distribution, battery charging systems designed for air, land and naval platforms.

Omnetics

Ultra-miniature Micro and Nano interconnects, high-speed connector systems and custom harnesses for space, defence, and other size-critical applications.

IEH

Hyperboloid-contact connectors providing exceptional shock/vibration immunity, ultra-low contact resistance and over 100,000 mating cycles.

Insulated Wire

Precision microwave cable assemblies and interconnect solutions supporting frequencies to 135 GHz, with low-loss and phase-stable options.

EMI Solutions

Figure out EMI protection for connectors and enclosures: filtered connectors, flex-filter inserts, feed-through filters, flex assemblies, and filter modules.

ICPE

High-torque motion solutions including frameless torque motors, resolvers, servomotors, voice-coil motors, and limited-angle motors.

Safran Sensing Technologies Norway / Colibrys

Compact, tactical-grade MEMS-based IMUs and gyroscopes delivering precise inertial sensing for navigation, stabilization and guidance in demanding defence, aerospace and space applications.

Septentrio

Anti-jamming, anti-spoofing GNSS receivers and modules delivering robust multi-constellation, multi-frequency positioning for autonomous and mission-critical systems.

Xsens

IMU, VRU, AHRS and GNSS/INS technology from chip-scale modules to rugged IP68 units, enabling precise motion and orientation sensing.

Advanced Motion Controls

High-performance servo drives for all type of motors, combining high power density, advanced servo control, and flexible communication options.

Lin Engineering

BLDC, servo, slotless and frameless motors, together with linear actuators, for compact, high-performance positioning solutions.

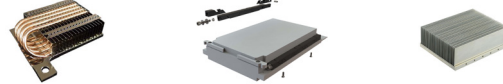

Tennmax

Customizable EMI shielding and thermal management solutions, including form-in-place conductive gaskets, environmental seals, heat spreaders, and thermal-interface materials.

Wakefield Thermal

Customizable complete thermal management portfolio including heat sinks, heat pipes, thermal-interface materials, fans, and wedge lock card retainers.

Ecrin Systems

Rugged embedded computers, servers, switches, and AI edge platforms, available in VPX, cPCI and compact form factors for demanding environments.

Diamond Systems

Rugged embedded computers, NVIDIA-based computing platforms, Ethernet switches and single-board computers for demanding defence and industrial systems.

SECO

SMARC, Qseven, COM Express and COM-HPC modules, and single-board computers.

Sealevel

Rugged embedded computers and connectivity solutions, including serial, Ethernet, and digital I/O interfaces, as well as USB, PCI and PCIe expansion cards.
