

UAV & Autonomous Air Systems

Power Systems & Battery Management

Power Conversion, EMI filter/PFC, VPX & UPS

SSPC & Motor Control

Flight Control & Actuation

Compact Servo Drives

Step Motors & Linear Actuators

Propeller Motors, Actuators

Flight Control, Navigation & Air Data

Tactical-Grade MEMS IMUs +
High-Stability MEMS Accelerometers

Resilient GNSS Positioning

MEMS Based IMUs

Air-Data Pressure Sensors & Transducers

Mission Computing, I/O & Avionics Data Bus

Rugged Mission Computers

Rugged Embedded & NVIDIA AI Computing

Computer-on-Modules & SBCs

Rugged Serial, Ethernet & Digital I/O

MIL-STD-1553 Bus Couplers

Rugged Interconnect & EMI Protection

Rugged Miniature Circular, Nano-D & Micro-D Connectors

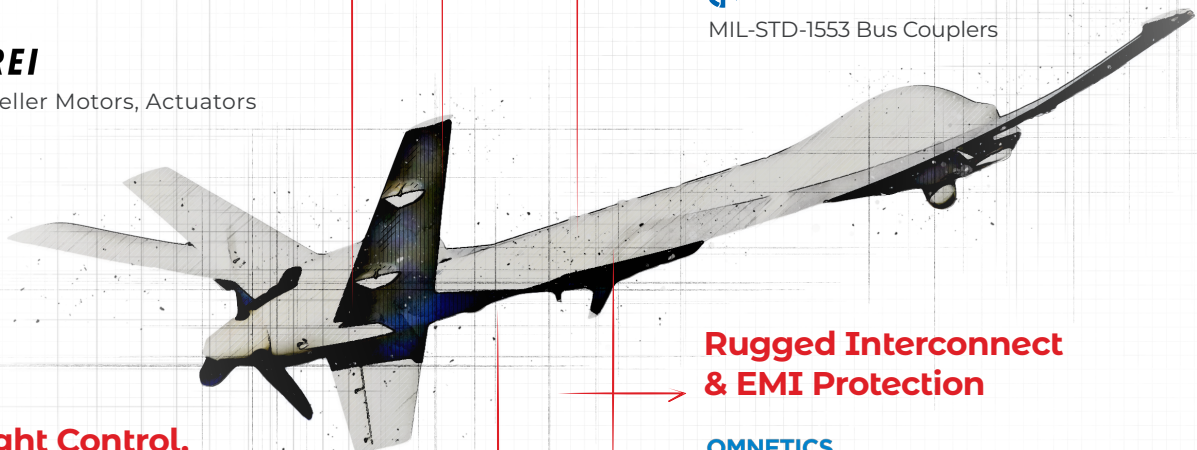

Hyperboloid PCB & Hybrid Power/Signal Connectors

Filtered Connectors & EMI Protection

RF Connectors, Adapters & Cable Assemblies

SynQor

Rugged, high-reliability power systems for demanding applications: DC/DC and AC/DC converters, EMI filters, PFC modules, UPS, and VITA VPX power solutions.

Sensitron

Solid state power controllers (SSPC), TVS and motor controllers, MIL-qualified and space-level diodes, rectifiers, and transistors.

Omnetics

Ultra-miniature Micro and Nano interconnects, high-speed connector systems and custom harnesses for space, defence, and other size-critical applications.

IEH

Hyperboloid-contact connectors providing exceptional shock/vibration immunity, ultra-low contact resistance and over 100,000 mating cycles.

Konnektrf

Complete RF interconnect portfolio of precision connectors, adapters and cable assemblies for microwave, test, and high-reliability applications.

EMI Solutions

Configurable EMI protection for connectors and enclosures: filtered connectors, flex-filter inserts, feed-through filters, flex assemblies, and filter modules.

Safran Sensing Technologies Norway

Compact, tactical-grade MEMS-based IMUs and gyroscopes delivering precise inertial sensing for navigation, stabilization and guidance in demanding defence, aerospace and space applications.

Safran Colibris

Fully calibrated, high-performance MEMS accelerometers offering exceptional stability and shock resistance.

Septentrio

Anti-jamming, anti-spoofing GNSS receivers and modules delivering robust multi-constellation, multi-frequency positioning for autonomous and mission-critical systems.

Xsens

IMU, VRU, AHRS and GNSS/INS technology from chip-scale modules to rugged IP68 units, enabling precise motion and orientation sensing.

Memscap

High-accuracy MEMS pressure sensors and transducers for aerospace, defence, and industrial applications.

REI

Electric motors and precision components, including DC and BLDC motors, servomotors, actuators, positioners, and resolvers.

Lin Engineering

BLDC, servo, slotless and frameless motors, together with linear actuators, for compact, high-performance positioning solutions.

Advanced Motion Controls

High-performance servo drives for all type of motors, combining high power density, advanced servo control, and flexible communication options.

Ecrin Systems

Rugged embedded computers, servers, switches, and AI edge platforms, available in VPX, cPCI and compact form factors for demanding environments.

Sealevel

Rugged embedded computers and connectivity solutions, including serial, Ethernet, and digital I/O interfaces, as well as USB, PCI and PCIe expansion cards.

Diamond Systems

Rugged embedded computers, NVIDIA-based computing platforms, Ethernet switches and single-board computers for demanding defence and industrial systems.

SECO

SMARC, Qseven, COM Express and COM-HPC modules, and single-board computers.

DEICO

MIL-STD-1553 bus couplers in box, PCB, and inline configurations, providing robust and configurable data-bus connectivity for avionics and mission systems.
