TRILOBYTE™

TRILOBYTE TM

The Trilobyte TM boasts three overt output colors together with NIR output modes. A mid-range model comes heavily equipped with standard features like Auto-Sync between units, an IR detector for early warning, and allows its user to program output signatures in overt and covert modes. All these features do not require the purchase or use of additional tools or accessories,

Our top-shelf model comes loaded with all the standard features in addition to an array of cutting-edge technology.

All models are available in Tan or Black. If this is not enough, the Trilobyte runs on AA batteries.

A person wearing a tactical helmet and vest is shown from the side, holding a rifle. The scene is dimly lit, with a bright window in the background. The text "TRILOBYTE™" is centered over the image, with a horizontal line underneath it, and "TACTICAL POLICE MODEL" is centered below the line.

TRILOBYTE™

TACTICAL POLICE MODEL

TRILOBYTE™ TACTICAL POLICE MODEL

The Trilobyte™ Tactical Police Model has some swagger of its own with its ability to switch from peace-keeping mode to door-kicking mode. Add an accessory and take it from the user's helmet to their K-9 partner.

Three overt output colors (Red/Blue/White) together with NIR output modes. This model offers a Take-Down mode, a Single Color Mode, and the ability to Auto-Sync the Emergency Lights. One hand operation easily switches over to NIR for Tactical Missions.

All models are available in Tan or Black.

A group of special forces soldiers in tactical gear, including helmets and vests, are shown in a dimly lit environment. They are holding Guardian Trident rifles. The scene is dark, with some equipment and gear visible on the ground. The text 'GUARDIAN TRIDENT™' and 'TRI-SPECTRUM' is overlaid on the image.

GUARDIAN TRIDENT™

TRI-SPECTRUM

GUARDIAN TRIDENT™ TRI-SPECTRUM

Whether on the helmet, backpack, vest, or K-9 harness, space is limited. The Guardian Trident™ Tri-Spectrum is a descendant of its previous Guardian Trident™ predecessors a long line – of products known for occupying the least amount of real estate on your gear while delivering the best results.

That small dome, offers Red/Green/IR Outputs in steady and flashing modes, with running times exceeding 200hours, and a replaceable battery. Whether its CQB, HALO, HAHO, or even Dive – the Guardian Trident™ series is also waterproof to 350ft.

All models are available in Tan or Black.

A soldier in full tactical gear, including a helmet with a night vision device and a flashlight, is shown in profile. The soldier is holding a rifle with a flashlight attached to the front. The scene is set at night, with blurred city lights in the background. The text "TACTICAL" is overlaid in the center of the image.

TACTICAL

FLASHLIGHTS

TACTICAL FLASHLIGHTS

Due to popular demand, Adventure Tactical finally released its first line of handheld tactical flashlights to the market. The only product line not made at our plant in Canada, the Tactical Flashlights are designed to meet Adventure Tactical's standard of excellence.

Our flashlights come loaded with complete accessories as well as rechargeable batteries and cables included.

A close-up, high-contrast photograph of a soldier in full tactical gear, including a helmet with a night vision device and a rifle. The soldier is positioned in the center, with their hands on the rifle. The background is dark and rainy, with water droplets visible on the soldier's gear. The overall mood is gritty and intense.

TIMELESS CLASSICS
