Micro gimbals

for intelligence, surveillance, target acquisition
and reconnaissance missions (ISTAR)

The **GS-214X** and **GS-218X** gimbals set new standards for size, weight and performance to meet the most demanding expectations of **2-axis** stabilized gimbals with dual-EO and best in class thermal imagers. Our gimbal comes with advanced image processing.

The built-in dual-EO camera ensures up to **40x** zoom (x20 optical and x2 digital), along with onboard recording and transmission to the ground control station. In addition to the EO camera, the gimbal offers a high-performance **Flir Boson+** thermal camera with 640x512 resolution. All this comes in a light compact size module with low power consumption.
